

SPN Dental Saves a Full Day per Month with Paytram

SPN Dental provides on-site dental services to healthcare facilities across the country—serving thousands of residents who lack access to in-house dental care. Patients or their caretakers subscribe to an affordable monthly plan that includes preventive exams and emergency treatment.

The Problem

With tens of thousands of patients across multiple states, managing invoicing and payment collection was time-consuming and error-prone. Manual processes meant days spent each month chasing payments and reconciling records.

The Solution

By integrating Paytram into their Salesforce workflow, SPN Dental streamlined the entire billing process, reclaiming an entire workday each month and improving cash flow consistency and speed.

How does it work?

-  Enrollment: ACH/card form emailed or texted from Salesforce.
-  Payment tokenized in Salesforce for auto-billing.
-  Monthly: invoices, charges, receipts, and records update automatically.
-  One-click, fully logged refunds in Salesforce, with audit trail.

The Impact

Salesforce is the single source of truth for medical and billing records. Enrollment, billing, and receipting is handled from a single platform - most of it automatically. Payment collection is secure, seamless, and fully integrated with existing workflows.

"Invoicing went from a full 8-hour day monthly to just minutes.

That's **One Workday Reclaimed** every month, **thanks to Paytram.**"
