

CSRHub Factsheet

CSRHub is the leading Consensus Environment, Social, and Governance (ESG) ratings and information service, globally. CSRHub's business intelligence system measures the ESG business impact that drives corporate and investor sustainability decisions. We cover 54,000 companies and provide ESG performance scores on 34,000 companies from 134 industries in 156 countries. Our Big Data platform uses algorithms to aggregate, normalize and weight ESG metrics from 900 sources to produce a strong consensus signal on corporate sustainability performance.

Data Structure

We cover 12 subcategories of ratings and rankings across the categories of environment, employees, community and governance. Our twelve subcategories are defined here:

<https://www.csrhub.com/csrhub-esg-data-schema>

Methodology

Over 13,500 indicators have been mapped to our 12 subcategories: <https://www.csrhub.com/csrhub-esg-ratings-methodology>

We tag companies for their involvement in 16 Special Issues. Our special issues are listed here:

<https://www.csrhub.com/csrhub-special-issues-list>

Entity and Company Coverage

We cover 54,000 entities. We have full or partial ratings on 34,000 companies and information on the available ESG sources and data on another 20,000 companies. CSRHub covers public companies, private companies, government organizations, and not-for-profits. You can see a full list here:

<https://www.csrhub.com/csrhub/>

We rate nearly 200 National Governments - see <https://www.csrhub.com/search/industry/National-Government>. We rate 270 State/Provincial/City Governments – see <https://www.csrhub.com/search/industry/StateProvincial-Government>

Data Sources

We aggregate 600 million data points from 900 data sources including many leading ESG financial analyst firms, crowd sources, government databases, not-for-profits, and publications. You can see all of our sources here: https://www.csrhub.com/our_data_sources/

Geographic Coverage

We cover companies in 156 countries. You can see our geographic coverage here:

https://www.csrhub.com/CSR_ratings_by_region_and_country/

Industry Classification

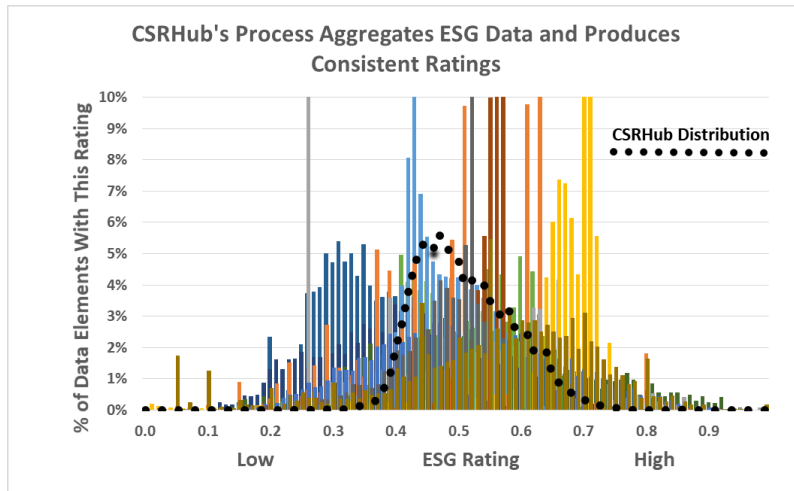

CSRHub classifies companies into one or more of 134 industries based on the North American Industry Classification System (NAICS) with some additions. You can see our industries here:

https://www.csrhub.com/CSR_industry_ratings/

Rating Rules

CSRHub follows a well-defined set of rules that determine when we can rate any part of a company's performance and also when we can offer an overall rating. Here is a summary of the steps in our rating process: <https://www.csrhub.com/csrhub-esg-rating-rules>

The diagram below shows the ratings distribution curve of 12 ESG financial analyst data sources. Some raters are skewed far to the left and some to the right. The overall distribution of company performance ratings becomes smooth after CSRHub processes this and other input data sets.

Data Access

We provide access to our data via CSRHub web based company pages, Advanced Boolean search tool. We provide Macro-enabled Excel dashboards - templates for Competitor, Stakeholder, SDG Rating, Historical, Change, and Supply Chain analysis. Partners access data using our RESTful (XML/JSON based) application program interface (API): <https://www.csrhub.com/csrhub-restful-api>. We also provide a secure data feed through strategic partners.

Updating of Data

We update our data monthly. We add new data sources as they emerge.

Data History

Our monthly data history extends back to December, 2008.

Licensed ESG Sources

CSRHub's 900 data sources include most leading ESG analyst data including CDP, Covalence, ESG Book (formerly S-Ray Arabesque), FTSE Russell, GaiaLens, Ideal Ratings, Integrum, InvestVerte, ISS, Moody's ESG (previously V.E Vigeo Eiris), MSCI ESG, MSCI Controversies, MSCI Governance, S&P Global ESG (SAM), S&P Global Trucost, and Sustainalytics. To these sources we add specialty ESG sources, indexes, publications, government data and crowd sourced information. We can pass through public data and some data from select licensed sources.

About CSRHub

Managers, professionals, academics, financial analysts, and API partners use CSRHub to benchmark company performance, learn how stakeholders evaluate company CSR practices, uncover new ways of understanding how ESG factors influence portfolio performance, and seek ways to create a more sustainable economy.

CSRHub is a privately held B Corporation. Its mission is to provide transparent access to ESG data to improve corporate ESG performance and global sustainability.
