

Clinical Excellence Built and Scaled through Salesforce Intelligence

Break down silos between your front office and clinical teams. Elixir EHR delivers a high-performance, ONC-certified clinical environment built natively on Salesforce.

Most EHRs are data graveyards. Elixir is an engagement engine. We've removed the friction from documentation, allowing providers to focus on patients while the platform handles compliance, interoperability, and reporting in the background.

Key Highlights for Decision Makers

True 360-Degree Patient View

Connect clinical notes, medication history (eRx), and lab results with real-time billing and intake data on a single screen.

Native Salesforce Architecture

Leverage the security, scalability, and AI capabilities (Einstein/Agentforce) of the Salesforce ecosystem—no messy third-party integrations required.

Compliance-First Design

HIPAA-compliant and ONC-certified, ensuring your organization meets the highest standards for data security and interoperability (HL7/FHIR).

Specialty-Specific Workflows

Fully customizable templates that mirror your specific clinical paths, reducing "pajama time" for providers.

Stop fighting your software. Start scaling your practice. Reduce provider burnout, improve charting accuracy, and ensure every clinical action is captured for revenue cycle optimization. Ready to see the future of clinical workflows?

ONC Certified | Ranked as a major contender in Everest PEAK Matrix | HIPAA Compliant | Salesforce Native

Platform Overview

Elixir EHR is a cloud-based, specialty-specific solution designed to maximize charting accuracy and clinical efficiency. By integrating directly with Elixir’s Contact Center and RCM, it creates a seamless flow from first contact to discharge.

The Pillars

**AI-Assisted Documentation**
Smart-drafting tools that reduce charting time and provider burnout.

**Prebuilt Intake Flows**
Standardized, automated onboarding flows for a frictionless patient experience.

**Intelligent Order Management**
Streamlined management of lab and eRx orders.

**Dynamic Clinical Templates**
Easy-to-maintain, specialty-specific note templates built for precision.

**Personalized Role-Based Screens**
Intuitive, custom UIs tailored to the unique workflow of every provider.

**Secure Interoperability Hub**
Enterprise-grade data exchange powered by the Salesforce trust layer.

**Care Plan**
Structured, goal-oriented care plans for any patient need.

**Audit-Ready Reporting**
Instant access to clinical KPIs and compliance logs.

Key Highlights

- Interoperability:** Securely exchange CCDA documents and support HL7/FHIR standards for seamless data sharing.
- Mobile-Ready:** Full functionality on desktop, tablet, or mobile, enabling care delivery at the bedside or in the field.
- Mobile-Ready:** Full functionality on desktop, tablet, or mobile, enabling care delivery at the bedside or in the field.
- Mobile-Ready:** Full functionality on desktop, tablet, or mobile, enabling care delivery at the bedside or in the field.
