

Close deals faster in Salesforce

Create, edit, and sign agreements without leaving your CRM. No tool switching.

No bloated workflows. No envelope fees.

\$18/user/month

Why teams choose Lumin Sign

Designed for today's businesses and tomorrow's AI-driven workflows.

Faster deals, less admin

Create, edit, and sign agreements in a single Salesforce-connected flow. No jumping between Word, PDF tools, and eSign platforms.

Enterprise-grade, SMB price

Secure, compliant eSignatures, advanced templates, and full audit trails at \$18/user/month. No envelope limits or hidden fees.

Salesforce as source of truth

Agreements stay tied to records from draft to signature. Certificates of completion attach automatically for cleaner reporting.

Easy to roll out, easy to use

Lumin is designed so teams actually use it. It takes minutes to install, minimal admin involvement. Intuitively designed for reps and customers.

Enterprise-grade security & compliance

Your agreements are protected by the same standards trusted by regulated industries worldwide.

SOC 2 Type 2 certified

Advanced end-to-end encryption with secure AWS hosting.

Verified Digital Signing

Cryptographic proof of signer identity.

Built for teams like yours

Sales teams

Generate agreements from Salesforce data, get them signed, and keep records in sync - all without leaving your CRM.

Customer success

Renew contracts with auto-attached certificates of completion and full audit trails tied to accounts.

Enterprise & Gov

Verified Digital Signing with cryptographic identity proof for high-stakes, compliance-sensitive agreements.

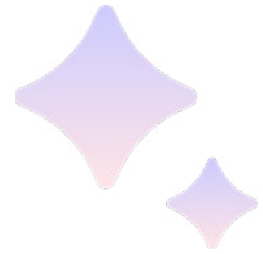

\$18/user/month

No envelope fees

Agentforce ready

Built for AI-driven agreement workflows

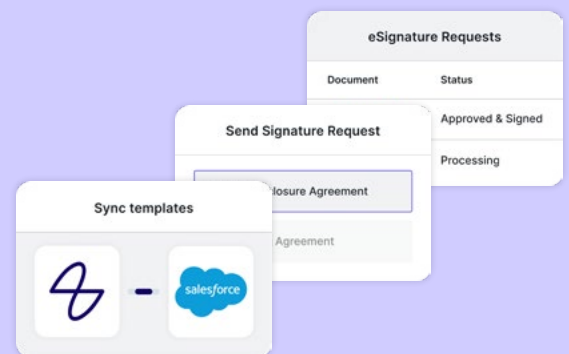

Lumin Sign is designed for the next generation of Salesforce automation, where reps, workflows, and AI agents work together to move deals forward.

Keep agreements moving

Generate agreements from Salesforce data, trigger signing flows automatically, and keep every record synced without manual admin.

Whether a rep clicks send or an AI agent initiates the workflow, Lumin keeps agreements moving inside Salesforce.

Agentforce ready

Agreements can be generated when opportunities progress

eSignature Requests		
Document	Status	Due
LS-005636-1	Approved & Signed	Aug 20
LS-003968-1	Processing	Aug 29
LS-002859-1	Needs Signature	Sep 04

AI agents can initiate workflows based on deal activity

Documents stay tied to Salesforce records from draft to signature

Designed for scalable, event-driven workflows, not manual handoffs.
