

Salesforce Managed Service

More than support. More than admin. Your outsourced Salesforce team.

Most Managed Services keep the lights on. Ours pushes your business forward. While traditional managed services focus on ticket resolution, ours is built to continuously improve your Salesforce platform, drive adoption, enhance processes, and ensure you never fall behind on best practice.

This is not a standard support contract - it's a strategic partnership.

Why Choose Xenogenix?

Strategic enablement, not ticket-taking

Prevent issues, optimise processes, and spot opportunities. Xenogenix don't just support Salesforce, we help Salesforce support your business.

Release management that keeps you ahead

Test new features, validate impacts, enable improvements, and keep your org future-ready.

Continuous optimisation built into every plan

Run ongoing reviews, enhancements and system tuning across any Salesforce product. This means your system gets better every month.

A proactive roadmap, not reactive firefighting

Regular account reviews where Xenogenix identify bottlenecks, spot missed opportunities and align Salesforce with processes. You get direction, not just answers.

Real consultants - not generic support agents

Every request is handled by skilled consultants. This isn't a helpdesk. It's access to senior Salesforce expertise on demand.

Faster response when it matters

2-hour, 4-hour or 1-day SLAs depending on your plan. Not just fast response - priority escalation by people who can actually fix the issue.

Salesforce Managed Service Benefits

Confident, empowered users

Training + quick support = fewer mistakes, faster adoption, better outcomes.

Higher ROI, every month

Continuous enhancements ensure your Salesforce system keeps delivering increasing value - not decaying over time.

Predictable cost, scalable support

Choose Bronze, Silver or Gold levels with clear hour bundles and SLAs.

An extension of your team

Instead of relying on a single Salesforce Administrator, access a team of certified experts across Salesforce products whenever you need them - without recruitment, training or employment costs.
