

Building Modern Telehealth Solutions with Eyeson

Eyeson delivers cutting-edge real-time Omnimedia communication solutions tailored for telehealth platforms and other industries. Our technology addresses critical challenges faced by doctors, patients, and telehealth providers, ensuring seamless, secure, and effective virtual healthcare experiences.

Eyeson One View APIs for Telehealth

A programmable Omnimedia API that enables secure video communication, patient monitoring, and data analytics. Build your own virtual consultations, real-time patient data integration, customizable layouts and more.

- **FULL PROGRAMMABILITY**
Video Communication APIs & SDKs, Layout APIs to create custom Mobile or Web Applications
- **SCREEN SHARING, MULTIPARTY, RECORDING.**
Enable the features that you need, disable the features that you do not want to integrate.
- **REGULATORY COMPLIANCE**
Build applications which will be compliant with healthcare regulations like HIPAA and GDPR.

Eyeson Salesforce App for Telehealth

An integrated solution within Salesforce that enhances telehealth capabilities through guided workflows, secure document sharing & seamless meeting data integration. It simplifies telehealth activities directly within Salesforce.

- **STREAMLINED WORKFLOWS WITHIN SALESFORCE**
Customize workflows to simplify and control Doctors, agents and Patients service processes.
- **ENHANCED COMPLIANCE**
Maintain compliance with secure, controlled and traceable documentation.
- **IMPROVED EFFICIENCY**
Doctors and agents stay within Salesforce, improving operational efficiency and control

Select the right integration approach
