NORTHERN WIDE PLANK

CUSTOMER SUCCESS STORY

Customer Introduction

Canada based Northern wide plank (NWP) primarily is a one stop shop for wooden interior products. They design, manufactures, and distributes engineered wide plank flooring, wall cladding, and other design elements, for both residential and commercial spaces.

Challenge #1: NWP encountered financial challenges including disjointed processes, limited real-time visibility, manual accounting tasks prone to errors, scalability issues in financial management, reporting and compliance difficulties, inefficient cash flow management, and increased risk of financial data breaches.

Solution #1: With sales, purchases, invoicing and billing being done within the Axolt ERP, account payable and receivables are completely traced end to end. Moreover Yodlee integration retrieves credit card transactions into ERP financial accounting system ruling out manual errors. Stripe integration allows direct payments from Axolt ERP.

Challenge #2: NWP has a need to deliver manufactured products with tight timeline and schedule. Hence managing resources becomes crucial.

Solution #2: Axolt ERP displays scheduled MO with their status, scheduled time and other details allowing tracibility. Visualizing MO details such as BOMs, Work orders allows user to allocate stock manually or automatically. Process cycles can be timed enabling accurate forecast.

Conclusion: In addressing NWP's multifaceted challenges, Axolt ERP provided comprehensive solutions that significantly enhanced operational efficiency and financial management. Axolt ERP's integrated solutions not only addressed NWP's specific challenges but also provided enhanced visibility, efficiency, and control across financial and manufacturing processes. By streamlining operations and reducing manual tasks, Axolt ERP enabled NWP to achieve greater agility, scalability, and profitability in their business operations.

ABOUT AXOLT ERP

AXOLT ERP supports the growth of small and medium-sized businesses by integrating all their front and back office processes into a single system. Built on the Salesforce platform, it provides complete visibility of the supply chain from supplier management, inventory management, warehousing and scheduling to sales order management, delivery and warranty & support. It is particularly suited to retailers and manufacturers looking to be more efficient, reduce costs and make it easier for customers to do business with them.
