

Cloud-Based Legal Matter Management For Law Firms

Meet Mitrates CaseCloud®

One proven way to improve productivity and service delivery is with new technology that creates efficiencies across all areas of the firm. Cloud-based solutions empower innovation, accessibility, and productivity at a faster rate than what could be achieved by technologies of the past – with the same or better security. Cloud-based CaseCloud® centralizes matter information while conforming to a legal department's unique work laws and business standards.

Law firms today struggle to produce the best work possible with the same or fewer resources than they've had in the past, as competition among firms tightens. They face pressure from outside counsel to keep rates low and keep client data tightly secure. The search for ways to more efficiently deliver service and increasing profit margins seems never-ending.

Law firms using CaseCloud® differentiate themselves from the competition by keeping rates in check, delivering more efficient service, and building stronger client relationships.

Achieve Results with the CaseCloud® Matter Management Solution:

- Improve and economize workflow from matter intake to resolution
- Increase effectiveness by capturing, prioritizing, estimating, and assigning matters using automated processes
- Standardize repeatable matter activities to maximize beneficial outcomes and ensure best-practice compliance
- Enjoy rapid customization and extension to meet changing business demands without dependency on single-vendor solutions
- Work anywhere, anytime, with cloud-based, full function and secure mobile access
- Increase profit margins and efficient delivery of services, while ensuring the security of client data
