

Lightning Path Palette

To install the package, use the provided link or access it via AppExchange.

Usage Instructions:

1. The user managing the system must be a **System Administrator**.
2. Assigning Permission Sets:
 - a. **Admin Users:** Assign the “Lightning Path Palette Admin Permissions” Permission Set to all users who require administrative privileges, allowing them access to lightning path palette configuration
 - b. **Normal Users:** Assign the “Lightning Path Palette User Permissions” set to allow users to view the updated colors.
3. In the App Launcher, search for and open the “Lightning Path Palette” app.

4. In this app there is one tab called “Lightning Path Setup”.
5. Once you open that tab you are able to see configuration component like this.

Lightning Path Palette

Please Select Object:

Please Select Path Field:

Lightning Path Palette Records (0)
Sorted by Object, Field

Object	Field	Preset	Confetti Value	Confetti Effect

Powered By Advayan (contact@advayan.com)

- From this component select the object where you want to configure a lightning path like Opportunity.
- After that select a field of selected object where your standard sales path is available.
- Once you select object and field your view is like below image

Lightning Path Palette

Please Select Object:

Please Select Path Field:

Choose When To Release The Confetti :

Available Options

- Prospecting
- Qualification
- Needs Analysis
- Value Proposition
- Id. Decision Makers
- Perception Analysis

Selected Options

Choose a Theme :

Confetti Effect :

- Here you can select the field value where you want to fire the confetti effect (you can select multiple values).
- And also, you can select confetti type and path color theme.
- After that click on submit.
- Once you click on “Submit” you are able to view your configuration which you just did.

Lightning Path Palette

Please Select Object:

Please Select Path Field:

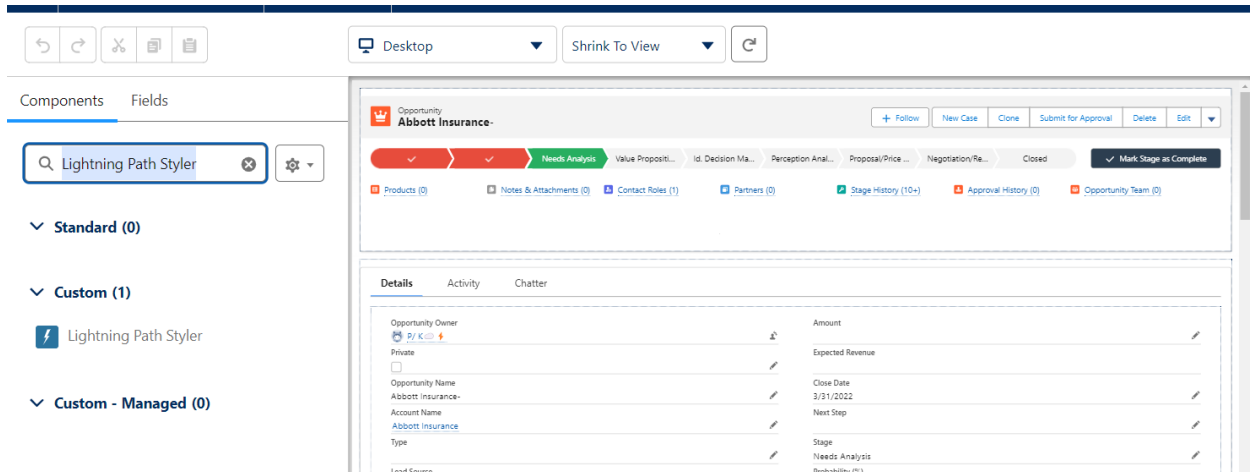

Lightning Path Palette Records (1)
Sorted by Object, Field

Object	Field	Preset	Confetti Value	Confetti Effect
Opportunity	StageName	Flame Pea + Jade Green	Prospecting:Qualification	Shower

Setup Lightning record page

1. Open that Object's any record for which you've configured path setup and you want to change the path color.
2. And click on the gear icon and click on "Edit Page".
3. Search "Lightning Path Styler" in the left side search box on the edit page.

4. Drag the "Lightning Path Styler" component and add it on the right-side below the lightning path page and click on save.
5. Now you are able to see your selected color for the page's lightning path and also you are able to use the confetti effect which you select for any stage value.
