

NetSuite - Salesforce Integration App

Cost-effectively connect essential and widely-used data objects such as Accounts, Contacts, Products, Opportunities and Sales Orders. Take advantage of prebuilt templates with a super easy integration platform setup.

Super simple user interface (UI)

The platform is designed with a clean, easy-to-navigate UI that makes it easy to quickly get up and running

Conveniently manage integration triggers

Define batch triggers as either unidirectional or bi-directional, real-time or scheduled

Essential & widely-used integration templates

Packed with predefined integration templates based only from proven use-cases and best practices

Secure & scalable platform

Built on a cloud-based, secure and highly scalable platform designed for mission critical operations and provides enterprise grade performance

Requires minimal to no maintenance effort

Excelym.IO handles all updates automatically, ensuring your integrations are always up-to-date without any user intervention

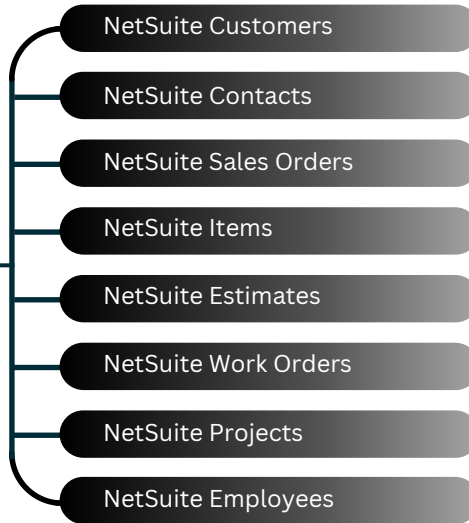

Easily customizable prebuilt templates

Leverage basic and widely-used integration templates with the option to seamlessly add complex use cases later
