

Improve system performance, automate compliance, and reduce storage without losing access to your Salesforce data.

Why archive data?

- IMPROVE SYSTEM PERFORMANCE**
Speed up processes for users and customers.
- COMPLY WITH REGULATIONS**
Archiving old data helps reduce the risk of noncompliance with regulations.
- ENHANCE YOUR USER EXPERIENCE**
Declutter your Salesforce instance and make it easier to find the information you need.

Control exponential data growth and keep only the data you actually need to unlock its full potential.

Drive performance at scale with Odaseva Data Archiving

Odaseva Data Archiving is built specifically for the largest enterprise Salesforce implementations. Our features are tailored to your requirements - not the other way around - so you can scale on Salesforce with ease.

DATA ARCHIVER
Remove data in an intelligent way. Sequence the process to target the right data, secure it, then remove it.

ARCHIVE VIEWER
Preserve your users' experience. Your organization can still access archived data in real-time.

“

“Thanks to Odaseva, we kept scaling our worldwide platform: reducing the number of logs, not reaching the limits of the platform, fixing the data skew issue, all the while keeping access to the data within the Salesforce platform for many years, without too much of an impact.”

—Salesforce Platform Architect at a Global Transport Company

”

Data Archiving

Improve system performance, automate compliance, and reduce storage without losing access to your Salesforce data.

Solve common data challenges with Odaseva Data Archiving

- Safely and reliably remove billions of records from your Salesforce org
- Retain access to your archived data in real-time
- Control exactly how you remove data even across complex relationships. Plan for cascade deletes, orphan records, and more.
- Manage LDV archiving backlogs without exhausting resources or manual processes.

Leverage the full power of the Odaseva Enterprise Data Protection Platform to properly control the safe removal of Salesforce data.

Laurence Hill
Operations Manager at CarMax

"I trust my data security to Odaseva. Over 2 years into using Odaseva to backup, archive, purge and audit my data recoverability on orgs > 15K users. It has been reliable and the tech and customer support second to none. Even better. the fact that the training materials and usability of the product suite just continues to get better and better!"
