

Flexible HR Powered by **salesforce**

flair is the #1 Salesforce-native HR and recruiting solution. It combines a powerful, customizable Salesforce backend with an employee-friendly frontend, helping to increase efficiency in all HR processes.

With modules covering the entire employee lifecycle, from hiring to offboarding, flair adapts seamlessly to your organization's requirements.

The Benefits of **flair**

Optimize the Full Employee Lifecycle

flair's features span the entire range of HR functions, reducing your reliance on multiple, isolated point solutions.

Grow at Your Own Pace

Choose the flair modules that address your most important HR priorities. Easily add new functionality and scale up as your needs change.

Centralize Your HR Data

With flair, you can unify all your candidate and employee data on one platform, creating a single source of truth you can rely on.

Tailor Processes to Your Organization

Thanks its Salesforce architecture, flair is highly customizable, enabling you to easily tailor processes to different business entities and locations.

Protect Your Sensitive Data

With flair, your HR and recruiting data is safely stored on the Salesforce platform, protected by robust security measures and role-based access controls.

Save Time With Automation and AI

flair enables you to automate recurring HR tasks through Salesforce workflows and AI features, reducing time spent on admin.

Gain Detailed HR Insights

flair comes with a wide range of pre-built standard reports to track key HR metrics. Refine your reporting with custom dashboards and Salesforce analytics.

Connect to Other Business Data

You can easily integrate flair with hundreds of Salesforce and non-Salesforce apps, connecting your HR data to other business areas.

flair HR Use Cases

-  Time & Attendance
