

Salesforce Services Overview

Celvan Consulting provides hands-on Salesforce architecture, development, and integration services for organizations that need scalable, maintainable, and reliable solutions.

Company Celvan Consulting	Focus Architecture, Development & Integrations	Location Sherbrooke, Quebec, Canada
-------------------------------------	--	---

Core Services

- Salesforce technical architecture and solution design
- Custom development with Apex and Lightning Web Components (LWC)
- Flow automation and platform optimization
- REST and SOAP API integrations
- Platform Events and event-driven architecture
- Service Cloud and Sales Cloud implementation support
- Production troubleshooting and technical debt reduction
- DevOps, CI/CD, deployment, and release support

Why Celvan Consulting

Celvan Consulting combines senior-level Salesforce engineering with the flexibility of a boutique consulting partner. Clients work directly with experienced technical resources for architecture, development, integrations, and complex problem solving—without the overhead of a large generalist consulting firm.

Selected Expertise

Architecture & Strategy	Development	Integrations & Delivery
• Technical architecture • Solution design • Scalability planning • System modernization	• Apex • Lightning Web Components • Flow • Custom business logic	• REST / SOAP APIs • Platform Events • DevOps / CI-CD • Production support

Engagement Types

- Architecture reviews and solution design advisory
- Custom Salesforce development and enhancement work
- Integration implementation and troubleshooting
- Overflow engineering capacity for partner teams and internal Salesforce teams
- Production issue triage and platform optimization initiatives

Ideal Use Cases

- Organizations implementing or evolving Salesforce with complex technical requirements
- Teams needing experienced Apex, LWC, API, or event-driven integration support
- Projects requiring clean architecture and maintainable long-term design
- Companies that need senior technical guidance without a large-consultancy model

Delivery Principles

Celvan Consulting emphasizes technical quality, transparency, maintainability, and business alignment. The goal is to help clients build solutions that solve today's requirements while remaining sustainable as the platform grows.
