PSC Record Page Header

Release Date: 2024-03-22

Highlight

Showcasing fancy/iconed buttons and incorporating over six fields within the highlights panel, all while utilizing scroll animation functionality, this component can serve as a catalyst for customizing the behavior of the page header/highlights panel.

Documentation

Component Label

PSC Record Page Header

Component Developer Name

c-custom-record-home-page-header

When there's a specific need to present visually appealing buttons adorned with icons, alongside the inclusion of more than six fields within the highlights panel, all while leveraging Salesforce's built-in scroll animation feature, this component assumes a pivotal role in tailoring the behavior of the header/highlights panel to suit unique customization requirements. By seamlessly integrating advanced visual elements and accommodating an extensive array of data fields, this component enhances the user experience and empowers administrators to finely tune the presentation of critical information within the Salesforce environment.

Public Properties

1. Icon Name

Provide the icon name for the Standard Object or Custom Object. Use the format 'icontype:iconname', where 'icontype' represents whether it's a standard or custom object, and 'iconname' refers to the specific icon associated with the entity in Salesforce. For example, 'standard:account' represents the standard Account object icon.

2. Object Name (Custom)

Provide the custom name of the object which will display above record name.

3. Header Background Color

Provide the background color for the header to brand header more like to your companies branding. Use rgb, rgba, hex color values.

4. Custom Follow Buttons Component

Specify the name of your dynamic Lightning Web Component (LWC) using the format 'c/componentName'. This component should be designed to serve as the follow and unfollow button. It will be placed in the slot designated for the follow and unfollow buttons.

5. No. Of Actions

The number of actions to display from the various actions derived from PlatformActions. This determines the maximum number of actions visible to the user within the component.

6. Standard Actions

Select one of these pick list values None General Actions Actions Powered By Platform Actions

Select one of these pick list values None,General Actions,Actions Powered By Platform Actions.

7. Custom Action Buttons Component

Specify additional actions for your organization in a customized manner. Please provide the name of your dynamic Lightning Web Component (LWC) using the format 'c/componentName', where 'componentName' represents the name of your LWC component separated by a forward slash. This component will be responsible for displaying the custom action buttons.

8. Custom Details Component

Define details or highlights for your organization in a customized manner. Enter the name of your dynamic Lightning Web Component (LWC) using the format 'c/componentName', where 'componentName' is the name of your LWC component separated by a forward slash. This component will be utilized to showcase the custom details or highlights section within the header.

About US

We specialise in empowering our customer's business growth through a comprehensive suite of products and related services on Salesforce platform. Our commitment lies in offering strategic product solutions and expert product development consultancy tailored to meet the unique needs of your enterprise.

At the core of our philosophy is the conviction that the success of business attaches with the timely and high-quality delivery to customers. Without the right tools and an improved worker's experience, attaining success becomes a tiring task. Operational activities can often become a juggling act for workers, making it challenging to prioritise and focus on meeting customer requirements, particularly in the context of transformative projects. We understand the pivotal role that a seamless blend of worker expertise and efficient tools plays in achieving successful outcomes for our clients. Drawing on our extensive experience in consulting services within the Salesforce ecosystem, we comprehend the challenges and have pioneered tools that elevate your workers' experience. This, in turn, results in a heightened customer experience, fostering repeated business.
