

ATS- Installation Guide

Pre-Installation Requirement

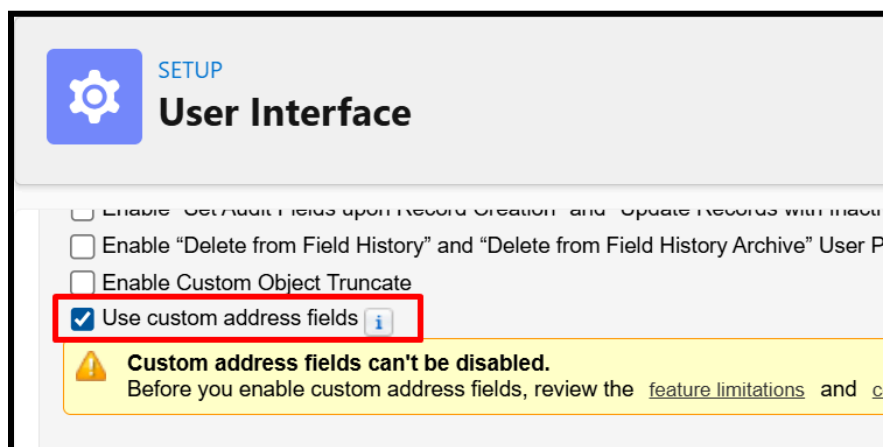

Before installing the Applicant Tracking System (ATS) application, ensure the following Salesforce setting is enabled in your target org.

1. Enable Custom Address Fields

The ATS application requires Custom Address Fields to be enabled.

Steps to Enable:

1. Navigate to Setup.
2. In the Quick Find box, search for User Interface.
3. Select User Interface.
4. Select the checkbox **“Use Custom Address Fields”**.

5. Click **Save**.

Important:

Custom Address Fields cannot be disabled once enabled.

Review Salesforce feature limitations before enabling this setting.

Usage Instruction

To understand how to use this Timesheet app please refer this file:

[Usage Instructions](#)

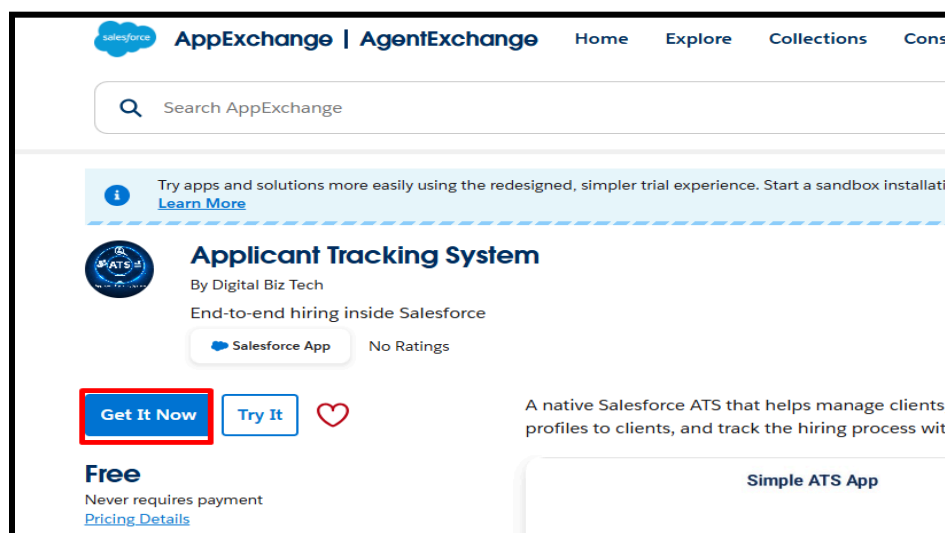

Install the App from AppExchange

Applicant Tracking System (ATS)

1. Install in Production Org

1.1. Click the [AppExchange Link](#) for the **Applicant Tracking System**.

Permission set Assignment

Admin has to assign the following permission sets to the respective users.

Recruitment Manager - Provides access to all components of the ATS application.

Recruiter - Users with the Recruiter permission set can view Client and Job Posting records. They also have full access to Resource, Skill, Skill Resource, and Submittal records.

Uninstall Instructions

- Before uninstalling Admin has to deactivate Flows which are active for this Application.
- We need to remove the permission sets related to this app that were assigned to users.
