2. Post Deployment Steps	5

1.Pre Deployment Steps

If you encounter issues during installation, follow these steps to resolve them:

- 1.Navigate to Setup.
- 2.Go to Translation Language Settings.
- 3.Enable the 'Translation Workbench'.

2. Post Deployment Steps

- 1.Assign the 'DMSP_Admin_PermissionSet' to admin users or users needing to set up mappings for objects.
- 2.Assign the 'DMSP_User_PermissionSet' to all end users.
- 3.Revert the Translation Workbench enabling if not required by the organization.

SETUP
Permission Sets

Permission Sets

On this page you can create, view, and manage permission sets.

4. While integrating the DMSP component with the Account page in the Lightning page Builder and after dragging and dropping the 'Record Page Multi Picklist Selection' custom component into the required placeholder , a warning message like the one displayed below appears on the screen . This is an expected behavior . You can click on the 'x' button on the top right corner of the message window to proceed further without any disruptions.

A Component Error has occurred!
