

Integrations and Connections

Our powerful API and out-of-the-box integrations connect the Intellum Platform to your other mission-critical tools and applications.

Integrations and Connections

Authentication and Single Sign-On

From Active Directory to SAML, we offer a number of ways to log users in:

Web Conferencing, Streaming and Broadcast

Integrate seamlessly with the most popular Web-conferencing, broadcast, and streaming services, including:

CRM, BI, Marketing, and Communication

Ensure that data associated with your education initiatives is flowing through your organization and correctly impacting audiences, other teams, campaigns, and programs.

Integrations and Connections

Created and Purchased Content

Load a wide range of assets created in popular content-authoring tools or purchased from third-party providers, including:

E-commerce

Powered by Spree, Intellum's approach to E-commerce allows you to present a modern content subscription model or set a price for an individual activity, path, certification, or event.

Certification

Integrate with top proctoring, grading, and badging solutions for deeper assessment and certification protection and portability.

HCM and HRIS

Deliver better field enablement, career development, and employee recommendations with an integration that relies on your HR solution as the real-time source of truth.
