Manage multiple warehouses under on environment

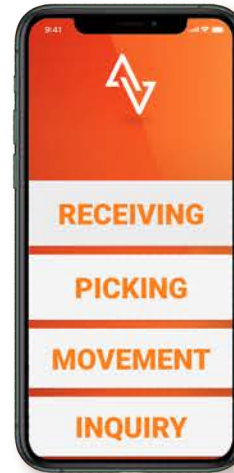

Mobile scanning app updates data in real-times

WAM leverages Salesforce & mobile scanning

Salesforce and WAM mobile scanner app interact in real-time creating a seamless transfer of data

Advantages of WAM on Salesforce

WAM is built entirely for the Salesforce platform as an enterprise level WMS

Being Salesforce native, WAM is able to give a 360 degree view of warehouse operations

Salesforce ensures all data security and up time, reducing resources expended on customer troubleshooting events

Mobile Scanning App

WAM Mobile allows a warehouse operation to work completely mobile and connects live to a business' Salesforce org.

- ✓ Take operations mobile with handheld scanner app
- ✓ Integrate with the services and tools that are important to your business
- ✓ Create and secure warehouse processes to ensure standardization
- ✓ Configure scanner to your processes
- ✓ Interact and update information live to Salesforce for real time and up to date data

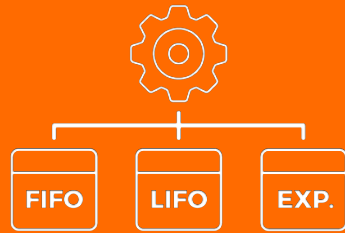

Mobile Scanning App

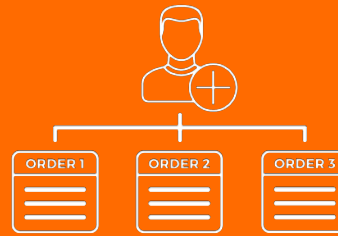

Much more than just scanning. Perform specialized tasks from WAM Mobile app.

- ✓ Pick inventory using best and most efficient path

- ✓ Manage inventory with allocation rules

- ✓ Perform bulk picking

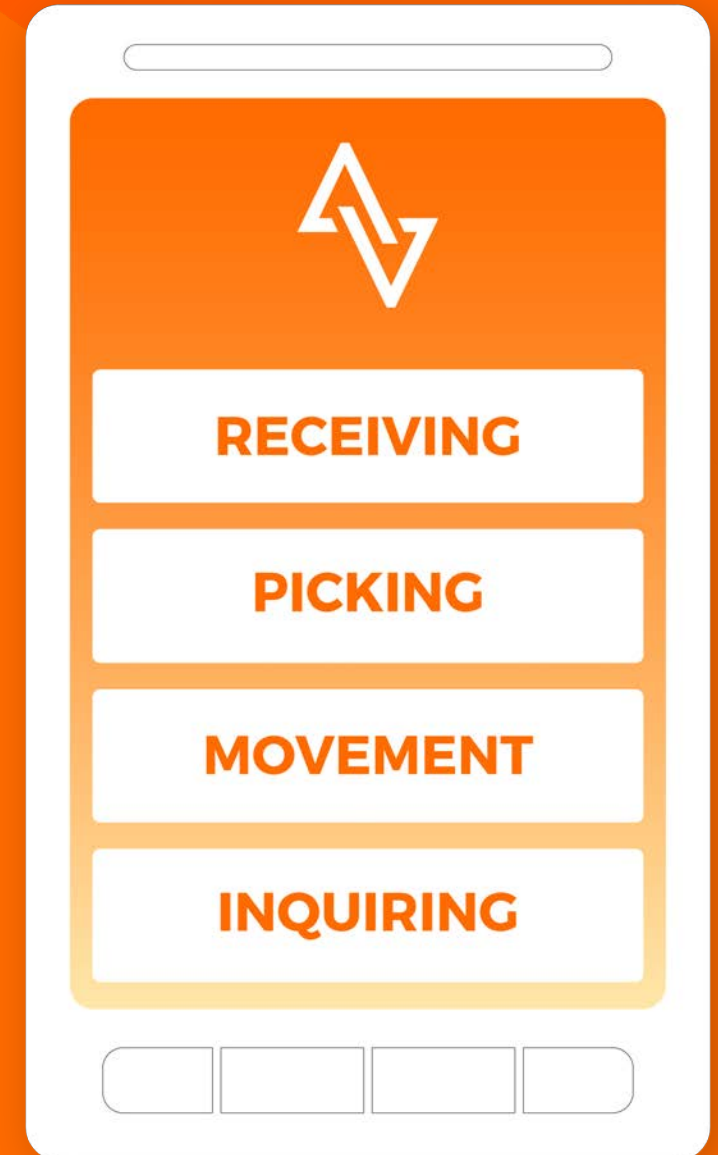

- ✓ Connect direct to carriers through API

- ✓ Print any necessary labels or documents

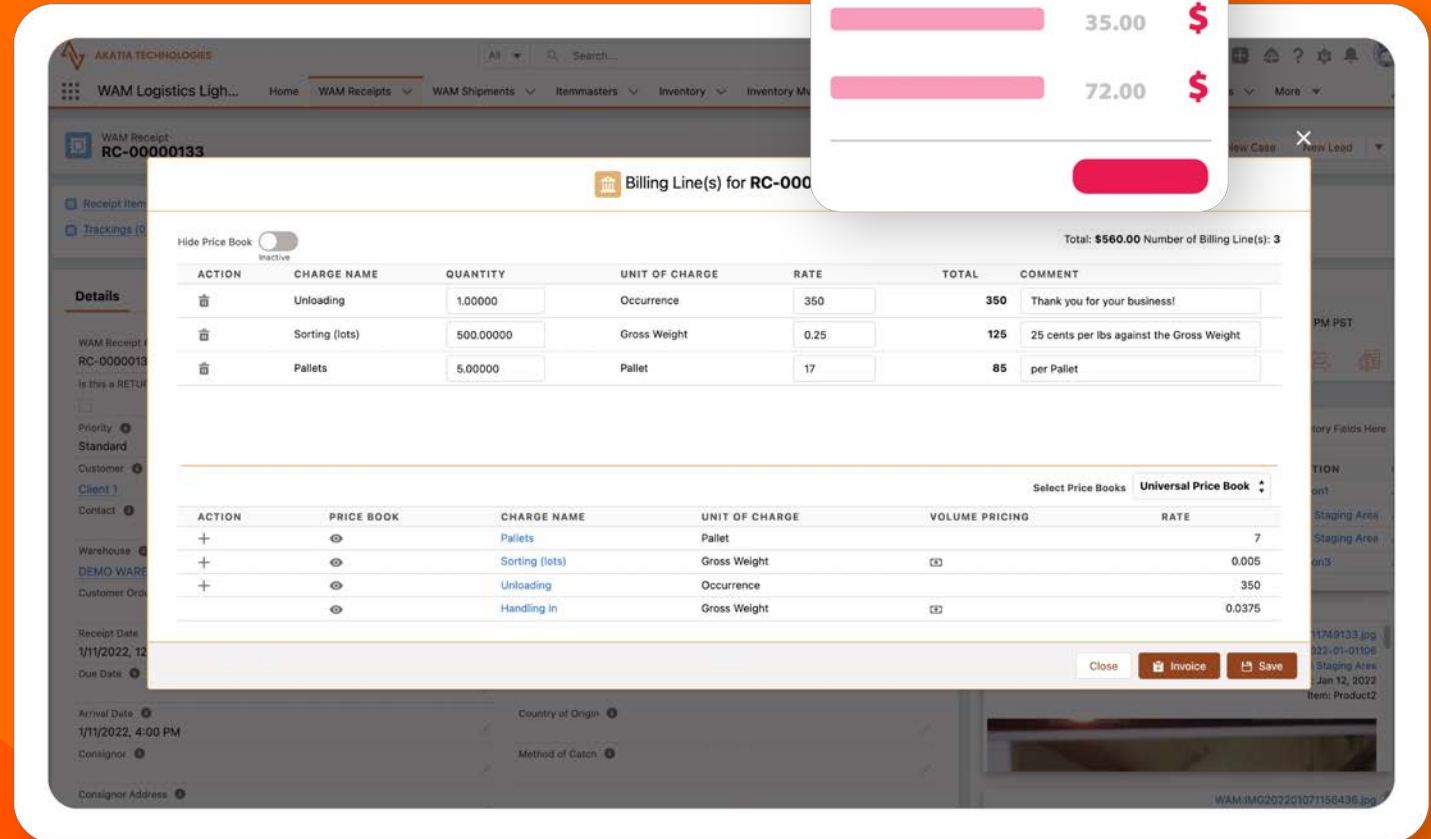

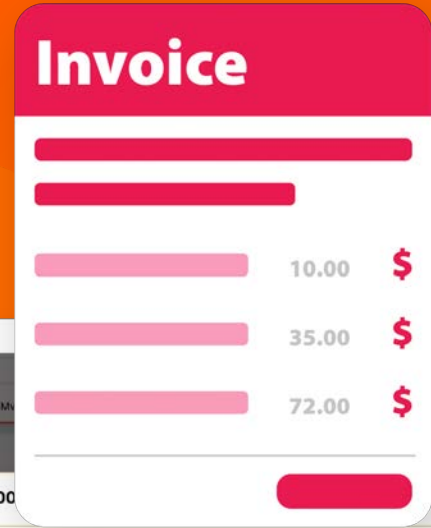

- ✓ Package fulfilment: item, weight, package size etc.

Billing & Invoicing

Boost revenues by accurately tracking and capturing charges for storage and other billables for organized and on time invoicing.

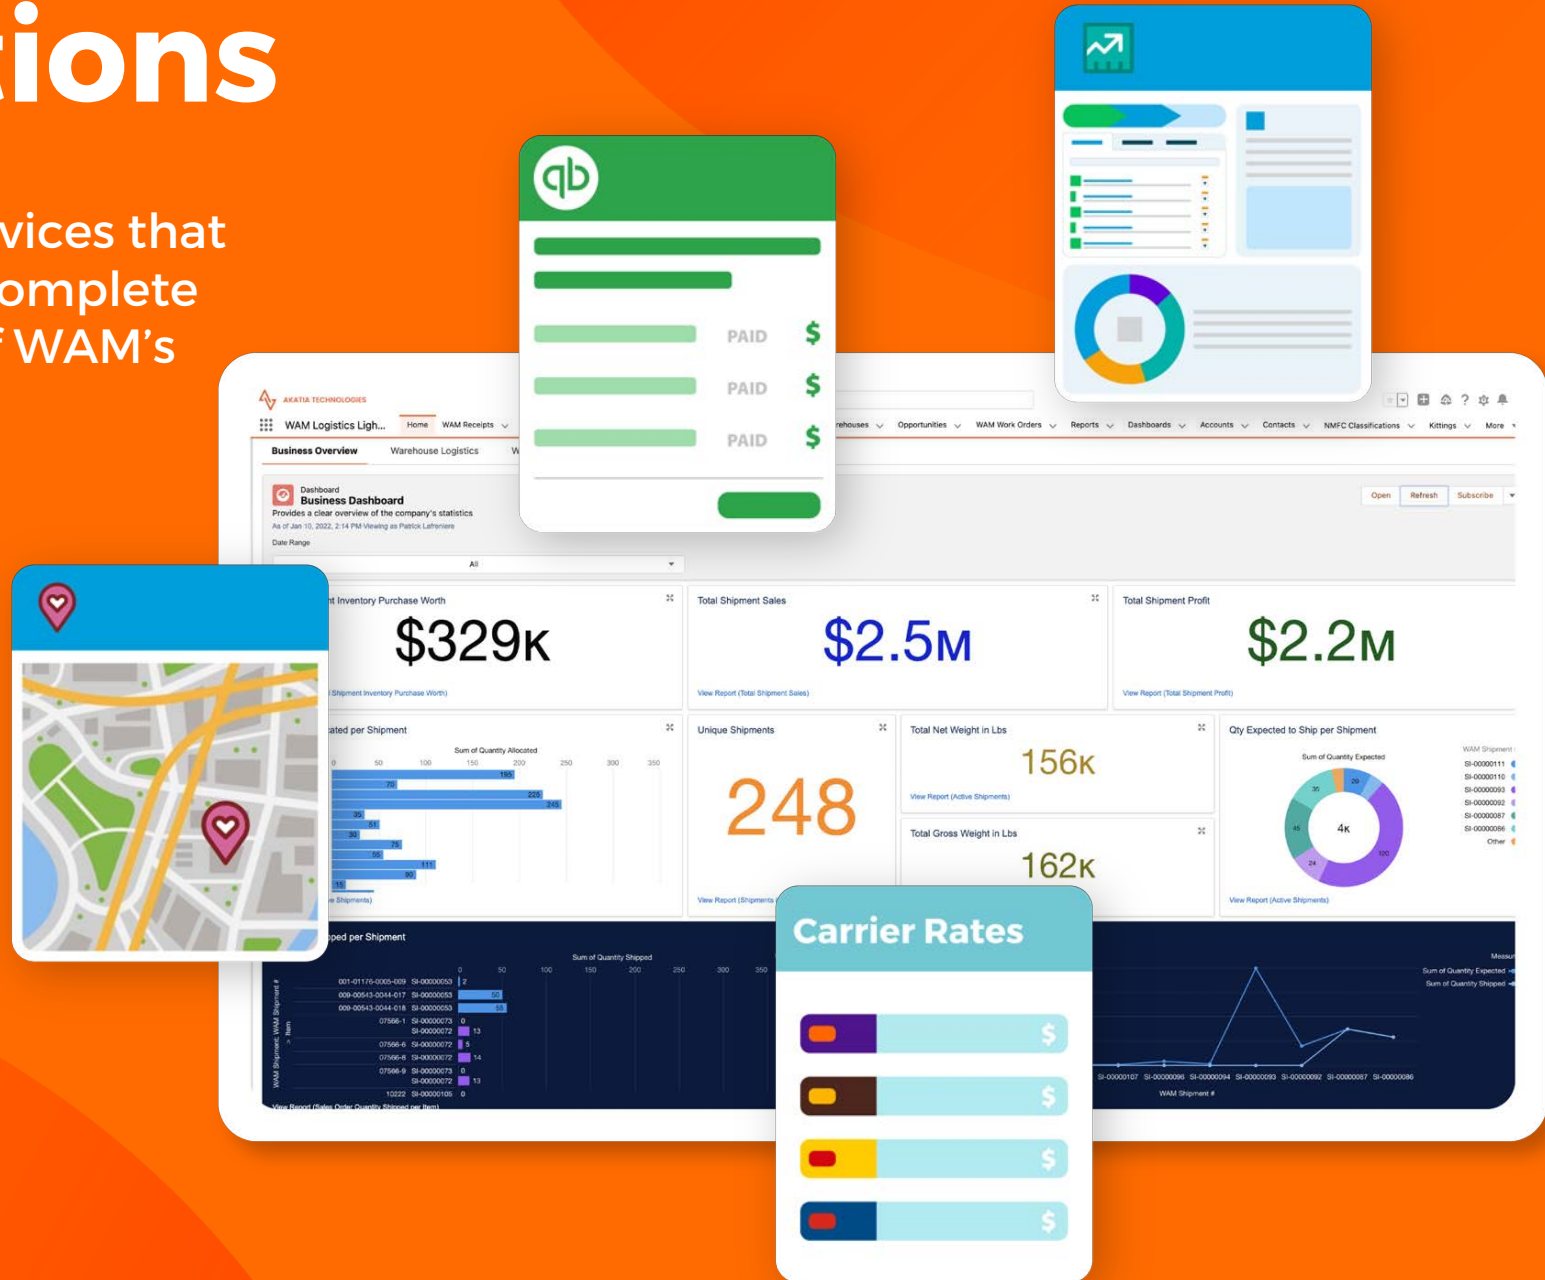

- ✓ Automate or manually collect charges for billing
- ✓ Capture storage charges based on any specific criteria I.E. unit of storage, location, weight etc.
- ✓ Set up customer specific rates (Price books)
- ✓ Automatically gather charges based on billing cycles (weekly, monthly, yearly etc.)

WAM Integrations

Integrate WAM with the tools and services that are important to your business for a complete and robust environment. See some of WAM's key integrations.

- ✓ Service Cloud, Opportunity Cloud and Field Service
- ✓ Accounting packages
- ✓ Carrier rates retrieval
- ✓ Transportation Management System (TMS)
- ✓ Electronic Data Interchange (EDI)

Dashboards & Reports

Track your entire warehouse environment in a single reporting portal. Track and visualize any data point that is important to your business.

- ✓ View reports in one single environment
- ✓ Schedule and receive refreshed dashboards
- ✓ Track and report on any data point
- ✓ Share and collaborate with key stakeholders
- ✓ Customize and filter reports per business needs
