Pulsar is a LocalFirst, end-to-end, offline and mobile solution for the Salesforce platform. The mobile app enables secure access to AI and Salesforce data, workflows, and user experience on iOS, Android, and Windows mobile devices.

Pulsar is also an application platform enabling users to:

- Access up to millions of Salesforce records while offline
- Run validation rules, triggers, default values, formula fields and more
- Customize the user interface, branding, processes, and workflows to deliver optimized mobile app experience

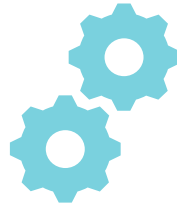

Take Salesforce Offline Anywhere

Local Data

- Scalable offline mobile solution allows users to run 3rd party cloud solutions such as Salesforce Field Service online or offline
- Millions of records can be downloaded

Rules Engine

- Set up business rules, validations, triggers, and approval processes
- Empower critical business processes online or offline
- Users always upload clean data

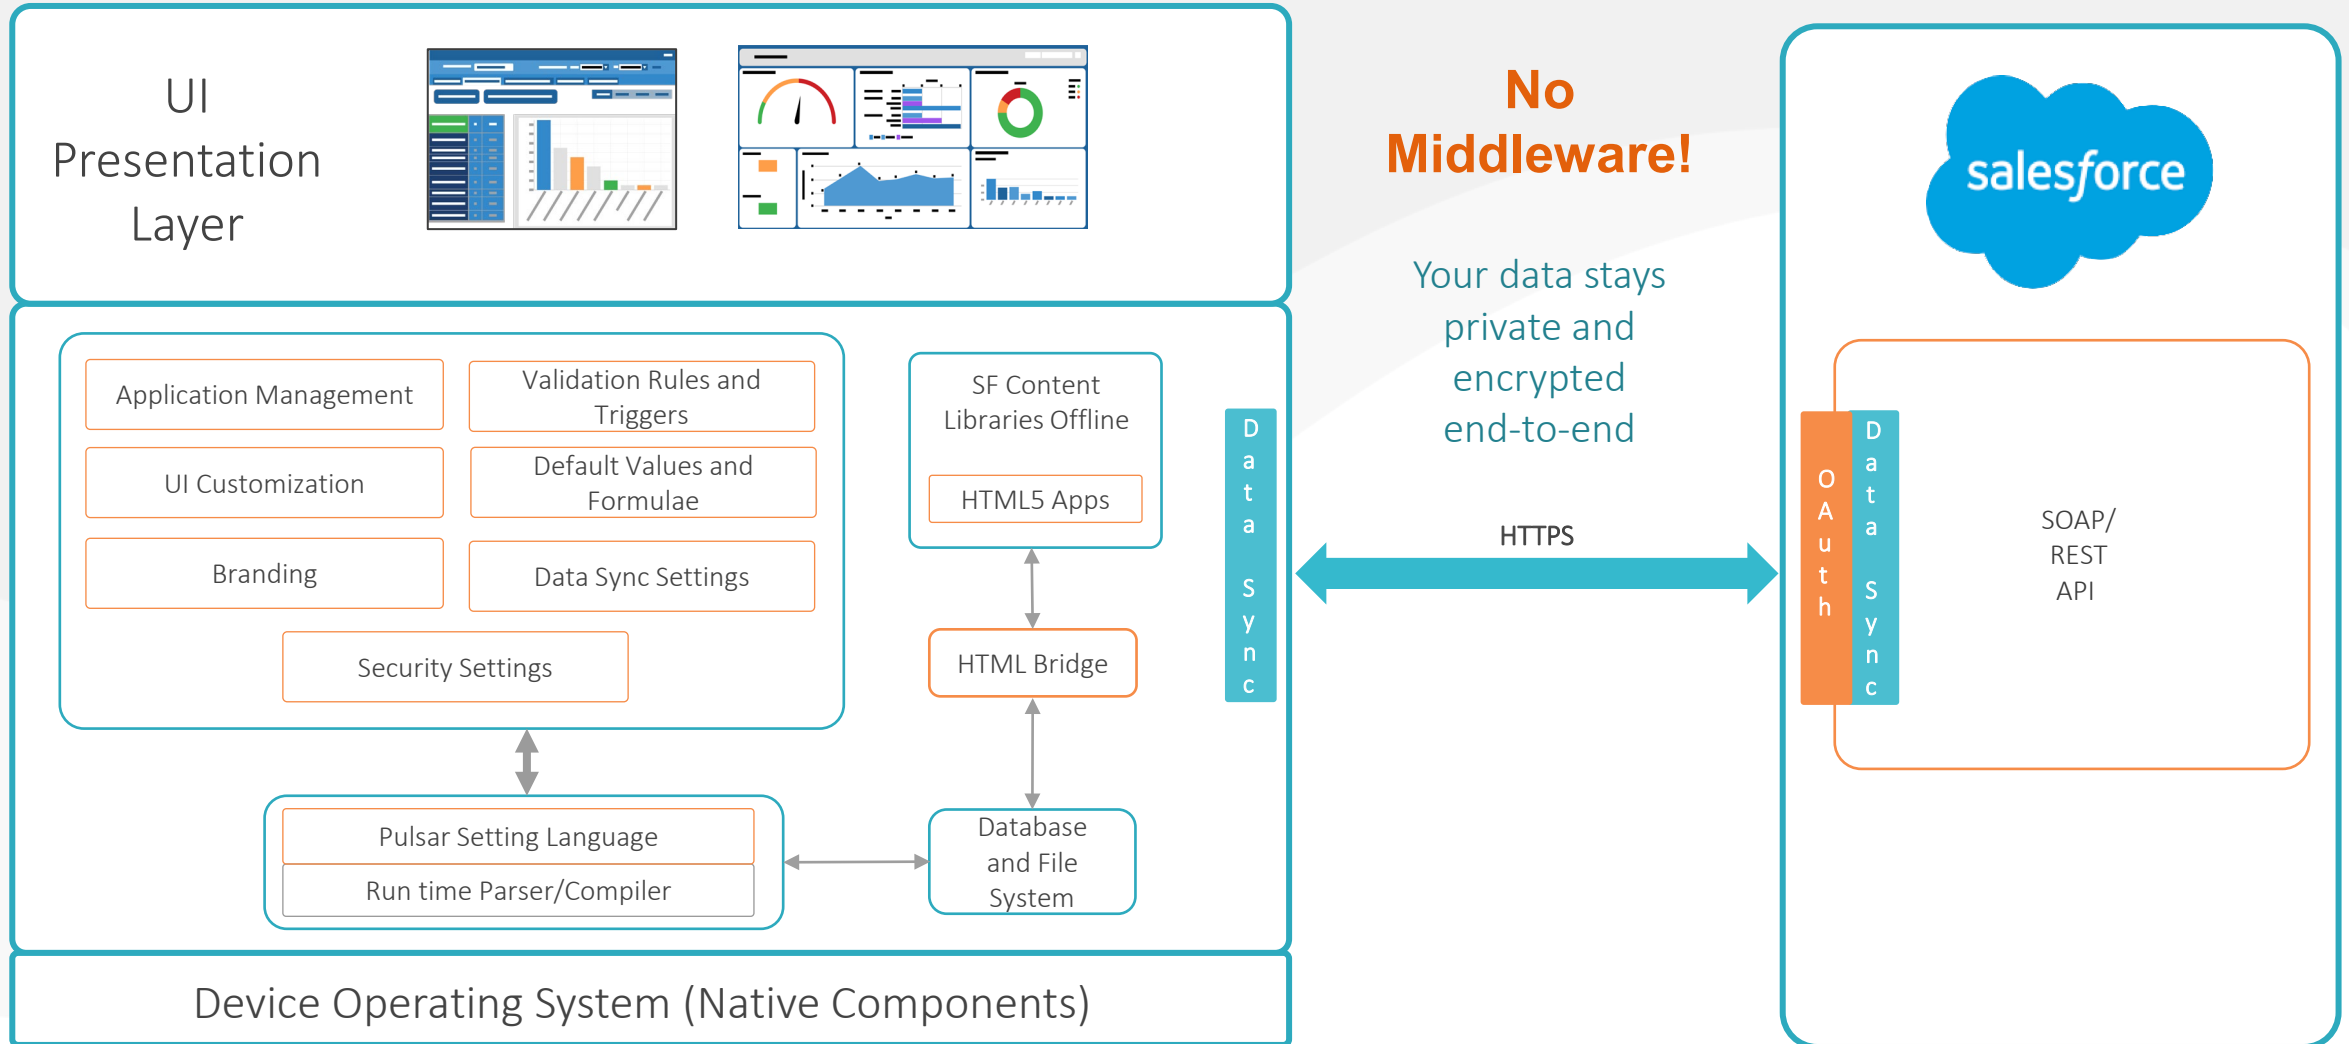

UI Customization Processes Workflows

- Customizable mobile UI
- Write HTML/JS pages to run within Pulsar while offline (i.e. - order forms, store display compliance reports, site inspection forms)
- Use AI to customize UI

Local LLM Model

- Integrated local LLM
- Does the work for the user
- Productivity improvements

Industry proven sync technology scales to handle massive amounts of data offline

USPTO 9305073, 10268643, 10909142

Completely designed and built within the Salesforce platform

No additional middleware

Small language model provides offline, AI-powered workflow assistance and insights

API metadata-driven user experience

Layouts, Schema, and Permission Sets automatically reflected from SFDC

Support for full platform functions

SSO/Portal logins, localization, validation rules, triggers, formulas, and rollup summaries

Allows for extensive UI customizations with optional AI assistance

Clients Love Pulsar

“The Pulsar platform has proven to be a very versatile and adaptable product to accommodate our business's complex workflow process. The collaboration, dedication, responsiveness, and professionalism of the Luminix team has been consistently excellent throughout our project.”

Clients Love Pulsar

“We have rolled our Pulsar to more than 4000 field service technicians who are mostly in remote areas with no connectivity. The offline capability of the product makes it seamless for them to complete their work and submit their time. We were also able to plug in custom reports and dashboards to help them plan their work week. The product is easy to set up...”

Clients Love Pulsar

“We have used this product for multiple years. From implementation through current the Vendor has been extremely responsive to questions as well as advanced troubleshooting. They have continued to advance their product over time, meet the changing needs of our business, as well as ensuring the seamless experience with the Salesforce platform.”
