

Automate credentialing and primary source verifications within Salesforce

Medallion for Salesforce enables healthcare organizations to automatically verify state licenses, NPI, SAM, OIG, DEA, NPDB, board certifications, Medicare Opt Out and more across multiple provider types directly on the provider's Salesforce profile.

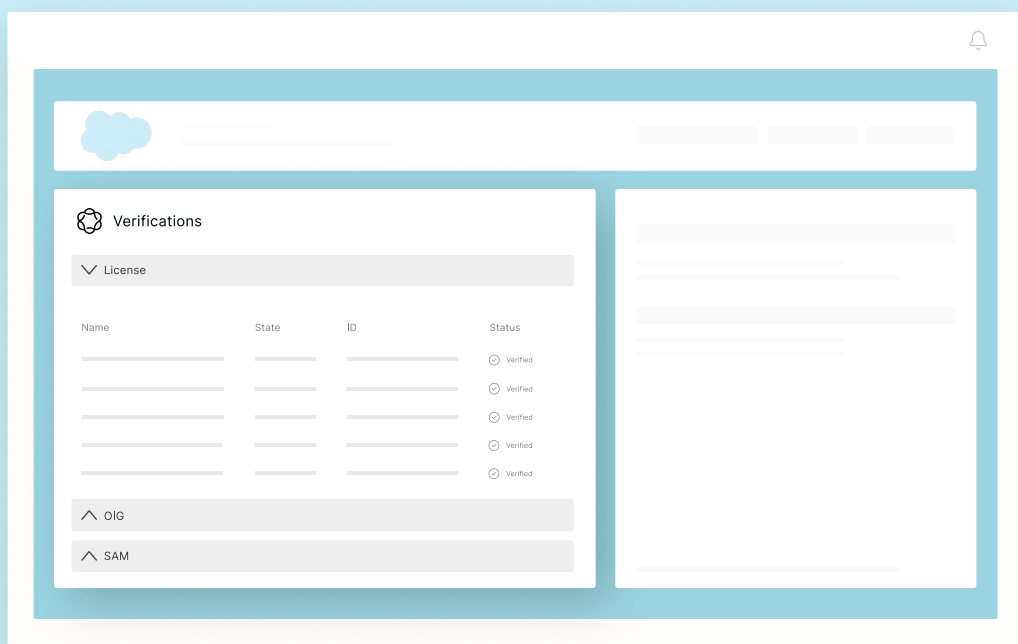

Centralize your provider data

Deploy Medallion for Salesforce to streamline your provider data network. It's compatible with any Salesforce Cloud or object. Our no-code step-by-step tutorial saves you time and effort.

Maintain one source of truth

From provider onboarding to ongoing monitoring, centralize verifications on the provider record. Automatically send provider data to Medallion when you create or update their information in Salesforce to take advantage of the full Medallion suite without duplicating any work.

Accelerate provider onboarding

Pre-screen providers with a single click or fully automated workflows. Results are quick and eliminate the need for manual review.

One-stop verification across hundreds of sources

Automatically verify state licenses, NPI, SAM, OIG, DEA, NPDB, board certifications, Medicare Opt Out and more across multiple provider types directly from Salesforce.

Ongoing monitoring without manual hassle

Say goodbye to the tedious manual process of primary source verifications. Just set your verification types and frequency, and let Medallion handle the rest.

Trusted by leading healthcare brands

“I would recommend Medallion to anyone in clinical operations because it substantially improved our data integrity. We were able to eliminate several spreadsheets and now exclusively use Medallion for maintaining provider data.”

Irina Shtemler

Compliance Manager

“Using Medallion's platform is very intuitive, and we have very few providers reaching out asking for help. It documents and prepares processes, policies, and procedures at every step. At the highest level, that was the biggest differentiating point for us.”

Matt Ortiz

Vice President of Payer Strategy & Relations

About Medallion

Medallion is the first solution built from the ground up to help healthcare organizations rise above regulatory complexity and offload their healthcare operations through a single, unified platform. By handling medical state licensure, payer contracting and enrollment, credentialing, ongoing monitoring and more, Medallion makes it faster, easier and less expensive for our partners to operate. We evolve operations, so healthcare organizations and their providers are free to evolve care.
