

Business Credit Checker —

Instant business credit, tax, and legal verification in Salesforce.

Business Credit Checker is a Salesforce-native app that brings commercial credit reports, business verification, public-record risk, and ongoing credit monitoring into a single workflow. Pull commercial credit data from Experian™, Equifax®, DataMerch, and PayNet®, review full reports or selected risk data, verify business and tax information, identify liens, judgments, bankruptcies, and UCC filings, and automatically update relevant risk data on Salesforce.

64% Faster Credit Decisions

Shorten business credit reviews

Faster Business Verification

Validate legal registration, tax info, liens, UCC filings, etc

Continuous Risk Monitoring

Monitor credit scores, delinquencies, risk changes

365M+ Businesses Covered

Assess risk across 62 countries

Why Firms choose Business Credit Checker —

- **Multiple sources. One risk view.** Simplify business credit check Salesforce workflow with reports from Experian™, Equifax®, DataMerch, and PayNet®, all in one place.
- **Legal + Credit in one view.** Review SOS registration, good standing, liens, judgments, UCC filings, and bankruptcies alongside the respective credit reports.
- **Verify before you commit.** Validate SSN, EIN, and TIN against IRS and SSA data, flagging any mismatches automatically in the same workflow.
- **Monitor after approval.** Automate ongoing bureau checks on active and high-value accounts, tracking score changes and delinquencies across portfolio.

Trusted by — **Goldman Sachs**

What it does —

Credit & Risk Intelligence

- **Pull commercial credit reports** from top bureaus and review full reports or targeted data segments
- **Review** payment trends, trade lines, credit history, credit limit recommendations & other bureau data
- **Identify public-record risk** such as liens, judgments, UCC filings, and bankruptcy history on the business
- **Validate** SSN, EIN, and TIN against IRS and SSA-backed data, with name and address match checks

Automation, Verification & Monitoring

- **Launch checks** from any standard or custom Salesforce object that holds business name, city, state
- **Automate credit checks** using Flow, Apex, triggers, or APIs
- **Automatically update** credit scores and risk fields directly on the Salesforce record
- **Continuously monitor** risk and trigger alerts based on score changes, delinquencies, or defined risk thresholds

4.93/5 customer satisfaction · 1,500+ projects delivered · 400+ customers

Pull commercial credit reports directly inside Salesforce.
