

Merito uses Aveneer to automate and accelerate document generation in its recruitment and enrollment processes.

“With Aveneer, we are just one click away from getting all documents for each student - accurate and fast. Our employees now have more time to serve our students better.” - **Robert Juszczak, Head of Sales at MERITO**

Customer Profile

Merito is the largest network of private universities in Poland, with campuses in 11 cities. With over 29 years of experience in higher education, it has served more than 325,000 graduates.

Challenge

- Inefficient recruitment and enrollment processes requiring extensive manual input and management.
- Slow document generation tool, taking 30 minutes to prepare a complete set of documents for a single student.
- High error rates in document preparation leading to corrections that delayed the enrollment process and increased workload.

Aveneer Value

- Document generation is now 5x faster, enhancing overall efficiency in processing documents.
- Document preparation time reduced from 30 minutes to less than 6 minutes per student.
- Monthly savings of 200 man-hours across the team by eliminating the need for additional document collation tasks.
- Merito employees are now able to focus more on student engagement and problem-solving, leading to increased satisfaction for both staff and students.
