

CapStorm for Supporting Industries

Scalable, Secure Salesforce Data Management for Innovation

Across fast-moving sectors like technology, manufacturing, telecommunications, and automotive, Salesforce is core to managing customer relationships, operations, and service delivery. As these businesses grow – especially through M&A – Salesforce environments can become fragmented, siloed, and difficult to govern.

Industry Challenges

Companies in these verticals often face a common set of data challenges as they scale operations, expand globally, or evolve their tech stack.

- **Unreliable or Incomplete Backups** – Lack of confidence in Salesforce data recoverability across multiple orgs
- **Analytics & Reporting Barriers** – Salesforce data is siloed and difficult to analyze across systems or departments
- **Slow, Manual Sandbox Processes** – Dev and QA teams lack access to safe, relevant test data
- **Org Complexity from M&A** – Consolidating orgs or aligning business units creates governance and migration friction
- **Compliance Pressures** – Increasing regulatory requirements and internal data controls demand better auditability

Use Cases in Action

CapStorm's platform adapts to each stage of your growth—whether enabling analytics, supporting dev teams, or navigating an acquisition.

- **Reliable Backup & Recovery** – Protect critical Salesforce data across environments with point-in-time recovery
- **Off-Platform Data Integration** – Power dashboards, machine learning, and analytics in Snowflake, Azure, or Oracle using real-time replication
- **Sandbox Seeding for Testing & Training** – Provision sandboxes with real or masked data to accelerate UAT, QA, and onboarding
- **Org Migrations & Multi-Org Management** – Streamline mergers, business unit alignment, or platform consolidation with secure data transfers
- **Governance & Audit Readiness** – Enforce retention rules, track changes, and ensure compliance with internal and external standards

How We Solve Challenges

CapStorm delivers flexible Salesforce data management that evolves with your business—across orgs, platforms, and teams.

- **CS:Enable** – Provides incremental, full-fidelity backup and secure replication under your control
- **Sandbox Seeding Extension** – Supports realistic, policy-compliant UAT, QA, and training environments
- **Database Connectors** – Move Salesforce data into SQL Server, Oracle, PostgreSQL, Snowflake, or other internal systems for analytics and operational alignment

Who Benefits?

CapStorm serves the teams driving transformation across industries:

- **Salesforce Admins** – Simplify backup, sandbox, and migration processes
- **Salesforce Architects** – Design scalable, secure org strategies and data pipelines
- **IT Leaders & BI Teams** – Leverage Salesforce data for analytics and automation
- **Compliance Managers** – Maintain audit trails, control access, and support retention policies

Why CapStorm?

CapStorm delivers self-hosted Salesforce data control for organizations that need to move fast, stay secure, and scale with confidence. With near real-time backup, sandbox automation, and seamless data integration, CapStorm empowers teams across industries to build, innovate, and report—without compromise.
