

## Using Easy Sort in Salesforce Flow

### Overview

Easy Sort can be used in a Salesforce Flow via two Apex Actions.

### Apex Actions

#### Easy Sort Quote Line Items

Use this Action to sort Quote Line Items for a Quote.

##### *Parameters to pass:*

Quote Id - The ID of the Quote whose line items need sorting.

Sort Order - The sorting criteria (e.g. "Quantity DESC", "Product2.Name"...).

Update Quote's [Easy Sort Order] Field - Boolean flag controlling whether the [Easy Sort Order] field on the Quote records the selected Sort Order.

#### Easy Sort Opportunity Products

Use this Action to sort Opportunity Products for an Opportunity.

##### *Parameters to pass:*

Opportunity Id - The ID of the Opportunity whose products need sorting.

Sort Order - The sorting criteria (e.g. "Quantity DESC", "Product2.Name"...).

Update Opportunity's [Easy Sort Order] Field - Boolean flag controlling whether the [Easy Sort Order] field on the Opportunity records the selected Sort Order.
