

Streamline Your E-Commerce Data Management with CSV Import Export

CSV Import Export Cartridge for B2C Commerce

The CSV Import Export cartridge provides detailed instructions on importing and exporting catalog products, inventory, pricebooks, customers, orders, and custom objects using CSV files. It integrates seamlessly with Salesforce Commerce Cloud (SFCC) Business Manager. It offers a user-friendly interface for bulk import and export operations related to catalog products, inventory, pricebooks, customers, orders, and custom objects.

Key Features

CSV Import/Export for Catalog Products, Inventory, and Pricebooks:

- Efficiently manage product data, inventory, and pricing through CSV files.
- Supports both standard and custom product attributes.

Catalog Products:

- Import and export entire product catalogs.
- Includes all necessary attributes for bulk creation and updates.

Specific Products & attributes:

- Target specific products for selective export.
- Target specific attributes from the catalog for precise and selective export.

Inventory:

- Manage stock levels and warehouse data via CSV.
- Ensures accurate and up-to-date inventory records.

PriceBooks:

- Import and export detailed pricing information.
- Supports various pricing structures, currencies, and regions.

CSV Import/Export for Custom Objects:

- Extends import functionality to custom objects within the SFCC instance.
- Facilitates data backup and external data usage.

CSV Import/Export for Customers:

- Directly import and export customer data.
- Supports bulk operations for efficient management of large customer volumes.

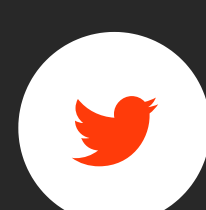

CSV Export for Orders:

- Export orders into CSV format.
