

Document generation for modern Salesforce workflows

Generate Microsoft Word documents, PowerPoint slides, and PDFs from Salesforce data in seconds.

Document generation, easier than ever.

You've invested in Salesforce to centralize your data, but manually creating documents still takes too much valuable time. What if your team could generate polished, data-driven documents without copying and pasting information from Salesforce? What if those documents were automatically stored in their corresponding Salesforce record? What if you could automate the entire process? With Merge Connect, you can.

Merge Connect eliminates manual document creation by generating Word Docs, PowerPoint slides, and PDFs using your Salesforce data. The Merged Documents component makes document generation effortless. From any Salesforce record, users can instantly create

quotes, proposals, contracts, and more, all dynamically filled with the latest data.

Merge Connect's Template Builder brings an elegant, familiar, no-code experience to a single browser tab, so you can design beautiful document templates without leaving Salesforce.

Using the Automate Merge Flow action, you can automate all of this with Record-Triggered, Autolaunched, and Screen Flows.

With Merge Connect's straightforward setup, you'll be generating documents in 30 minutes! Sign up for our free 14-day trial at appiphony.com/merge-connect.
