

SuperTRUMP

Make the Right Moves

PRICE WITH CONFIDENCE

Peace of mind that modeling and pricing results are accurate when compared to internal tools

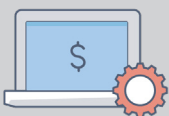

DELIVER RESULTS

Meet each customer's unique requirements by modeling transaction economics any way you wish

UTILIZE REPORTS

Over 350 accounting and economic reports created for the equipment finance industry

MAKE IT YOURS

Customize SuperTRUMP to meet your business needs and integrate with other software

SuperTRUMP makes modeling and pricing leases and loans simple.

PROFIT FROM POWERFUL, ACCURATE ANALYSIS

Accurately calculate economic and accounting data — yields, rents, payments, taxes, residuals — to maximize profit.

Quote deals in less than a minute and perform financial analysis and optimization with data that is consistent across the organization.

Use the “target” feature to lock down certain variables and solve for others giving maximum deal flexibility.

Create templates for each financial product to guide sales people and avoid modeling mistakes.

PRICE A FULL RANGE OF TRANSACTIONS

Process any type of transaction — from straightforward loans to single-investor leases, to rate card programs, to highly structured tax leases.

Account for a full range of fees, subsidies, book and tax depreciation methods, FASB ASC 842 and FASB 13 rules, and IRS classification tests while automatically loading cost of funds at the transaction and asset level.

Easily maximize tax benefits by defining proprietary yields, including ROE, ROA, IRR, MISF and spreads over indices.
