

Ascent ERP

Flagship application for inventory control, purchasing (PO), order management, warehouse, production work orders, and reverse logistics on Salesforce.

Achieve Operations 360

Inventory Visibility & Control

Complete inventory management to track regular and serialized inventory across the supply chain from the manufacturing floor to the customer doorstep.

Order Management

View all orders in a central location for increased visibility across opportunities, quotes, invoices, allocations, back orders, staging, drop shipping and returns.

Demand Management

Real time visibility into the fulfillment of omnichannel orders, replenishment, and returns. Receive guidance to manage demand effectively.

Purchasing

Manage POs, receipts, vendors, trade agreements, and returns. Forecast demand, dropship to customers and select suppliers based on price and product availability.

Bill of Materials & Production Management

Manage multilevel BOMs, version and revision control. Insight into lists of raw materials, sub-assemblies, parts and quantity needed to manufacture or assemble finished goods.

Work Order Management

Product inspection, installation, maintenance or repair. Service requests while tracking labor, parts consumptions to invoices.

Warehouse Mobility

Receive purchase orders, stage, pick, pack, and ship with wired or wireless barcode devices.

Financials

Track financial journals for inventory movements. Export or integrate journal entries into accounting systems for real time quote to cash management.
