

SSIS COMPONENTS FOR SALESFORCE

SSIS Integration Toolkit offers an easy-to-use and cost-effective data integration solution for the Salesforce platform, including Tableau CRM (Einstein/Wave Analytics), Salesforce Marketing Cloud and Pardot, by leveraging the power of Microsoft SQL Server Integration Services (SSIS).

DATA INTEGRATION MADE EASY

SSIS Integration Toolkit for Salesforce is designed with the goal of maximizing your development productivity by providing you a streamlined development experience. The tool handles all the intricate details involved in working with the Salesforce data model and business logics, so that you do not have to, therefore you can spend more time on your data rather than on the tool.

KEY FEATURES

- Utilizing the codeless data integration approach enabled by SSIS and our software, you can forget all intricate details involved in working with the Salesforce API when developing data integration solutions
- Refresh Salesforce Metadata feature available for Source and Destination Components to retrieve latest metadata from the Salesforce server.
- Support for Assignment Rule option in Salesforce Connection Manager for special case when writing to lead or case object in Destination Component
- Starting with the Free Developer License for any interactive use, we offer the most flexible licensing model.

MAIN COMPONENTS

SALESFORCE CONNECTION MANAGER

- Configure and manage Salesforce connections within SSIS through an intuitive interface.

SALESFORCE SOURCE COMPONENT

- Read Salesforce data using either Salesforce objects or SOQL queries, including relationship queries, aggregation and datetime functions, parameterized queries, Bulk API support, configurable batch sizes, and retrieval of deleted or archived records.

SALESFORCE DESTINATION COMPONENT

- Supports Create, Update, Delete, Upsert, Merge, HardDelete, and Undelete operations with Bulk API support, text lookup functionality, and configurable datetime handling options.

SALESFORCE MARKETING CLOUD CONNECTION MANAGER

- Configure secure connections to Salesforce Marketing Cloud within SSIS packages.

SALESFORCE MARKETING CLOUD SOURCE COMPONENT

- Retrieve data from Salesforce Marketing Cloud with configurable batch sizes, filtering conditions, metadata refresh capabilities, and timezone handling options.

SALESFORCE MARKETING CLOUD DESTINATION COMPONENT

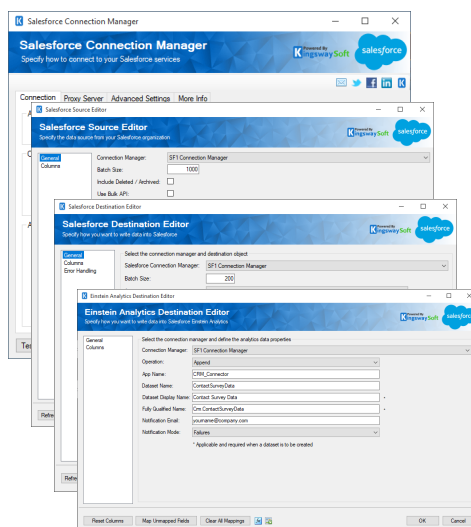

- Write and synchronize data to Salesforce Marketing Cloud objects directly from SSIS data flows.

SALESFORCE EINSTEIN ANALYTICS DESTINATION COMPONENT

- Supports Append, Delete, Overwrite, and Upsert operations for loading data into Salesforce Einstein Analytics (Wave Analytics / CRM Analytics).

SALESFORCE PARDOT REST COMPONENTS

- Connect to, read from, and write to Salesforce Pardot REST services.

BENEFITS

- One single solution that works for Salesforce.com.
- The toolkit helps you manage all the intricate details involved in working with Salesforce data model and business logics.
- Easy learning curve, consistent application interface, familiar development experience within SQL Server Business Intelligence development environment (Visual Studio).
- Free developer license is available for any interactive use without any limitations.
