

Run Your **Factory And** **Your Finance** — On **Salesforce**

Goldfinch unifies BOMs, work orders, inventory, costing, and accounting in a **single ERP** — natively inside the Salesforce platform you already trust.

Discrete, batch & configure-to-order production all in one platform

Real-time production costing tied directly to GL and inventory valuation

Demand-driven MRP using Salesforce pipeline + sales history

Lot & serial traceability from raw material to finished goods

Manufacturing Use Cases

Configure-to-Order

Link Salesforce sales activity directly with production planning, BOMs, and finished-goods costing.

Production Planning & MRP

Forecast demand from sales pipeline, run MRP, & auto-generate work orders and POs.

Production Cost Visibility

Material and labor consumption flow directly into financial reports — no reconciliation.

Better Together With Salesforce

Salesforce

CRM & opportunity pipeline

Service Cloud customer support

Marketing & lead automation

Reports, dashboards, Flow

GoldFinch Solutions

Work orders, BOMs, routings

Multi-warehouse inventory & lot tracking
