

PENTALYM™ FOR HOSPITALS

WORKFLOW EFFICIENCY TOOLS

Pentalym Charge is your multitool of software products to help your hospital staff maximise their efficiency and save time.

Charge's modules will allow you to gain efficiencies in the corridors and operating theatres of your hospital through automation and standardisation of processes. This will reduce the time your staff spend on prosaic administrative tasks and free them up to spend more time looking after their patients.

Preference Card Manager

Streamline your surgical workflow with Preference Card Manager. Effortlessly create, edit, manage and print detailed preference cards.

Case Manager

From scheduling and editing cases to creating QR-enabled pick lists and managing inventory locations, our Case Manager module maximises efficiency and productivity.

Charge Analytics

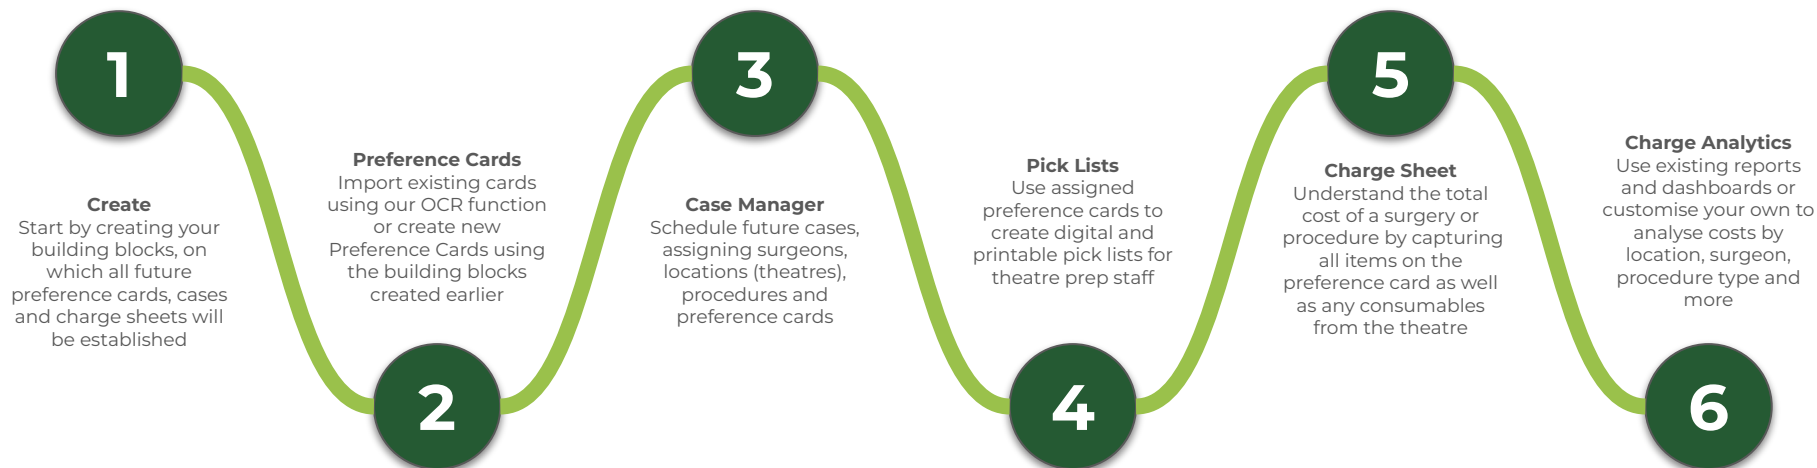

Easily generate and analyse reports and dashboards to gain valuable insights into costings by case type, location, surgeon etc. This module can also store your benefits schedules and prosthesis lists.

Administrator

Elevate control with our comprehensive administrator module, empowering effortless management of user and account settings. From user permissions to account configurations, our intuitive platform ensures streamlined administration for enhanced operational efficiency.

WHY USE PENTALY™?

- Operates on desktop or mobile devices (iOS or Android)
- Incorporates OCR technology to digitise VMO preference cards
- Preference cards and pick lists can be printed and linked through QR codes to the digital version
- Shows the full cost of a surgery in real time as the procedure is completed
- Standardises preference cards to allow efficiencies and streamlining of hospital procedures
- Reporting module allows full visibility of costs via location, surgeon, procedure type and others
- Built on the reliability and security of the Salesforce platform
- Cloud based solution that is compatible with most existing ERP systems on the market
