

Enabling growth by eliminating manual processes for a staffing company

“I think the software is really helpful and easy to use for the end users – those people who send out the docs or just sign them.” - Nancy van Heeswijk, Application Manager, Team Rockstars IT

Customer Profile

Since 2015, Team Rockstars IT has grown into a team of 600 selected software developers and data engineers who develop IT solutions for the customers on a project basis. The company is still growing fast with high ambitions. [Read the full customer success story here.](#)

Challenge

- The document generation and e-signing processes were slowing down both hiring and sales workflows.
- Existing tools lacked automation, which resulted in errors and inconsistencies.
- A solution was needed to integrate seamlessly with their ATS, Byner, and Salesforce, streamlining operations.

Documill's Value

- Automation: Eliminated manual document creation, significantly reducing errors and increasing efficiency.
- Customization: Delivered standardized templates, ensuring consistency across all documents.
- Seamless integration: Integrated smoothly with Byner and Salesforce, creating unified and streamlined workflows.
- E-Signing: Accelerated contract finalization by enabling e-signing directly within the system.

Documill's impact

- Increased Productivity: Freed up valuable time for strategic initiatives.
- Improved Customer Experience: Faster processing times enhanced both candidate and client satisfaction.
- Scalability: Enabled the company to grow rapidly while maintaining adaptable and efficient processes.
