

SMARTIQ™ Capabilities

Interactive Forms

Guided, mobile-friendly forms that allow an end-user to quickly and easily enter requested information that is required for a business process

Data Collection & Integrations

Extract and integrate from Salesforce to initiate a process, prefill and validate information with the end-user

Process Automation

Connect to Salesforce and notify stakeholders when approval is needed, update status for CSRs, automatically update customer records, and more

Output & Communications

Update Salesforce with collected information and generate personalized, branded communications in real-time, including documents for eSignature
