

Data Cloud Connector Licensing & Features

Pricing Model

1. Data Cloud Connector is a paid app and pricing is based on the Plan selected during subscription process.
2. Plan pricing is based on the Features available in the Plan. Which plan has what features are documented below.
3. Some Plans offer a trial period. Users can use the app for free during trial period and if user continues to use it after trial period, user will be charged based on the plan price.
4. Pricing is per Org / Per month basis. Org Admin decides which users in the Org can use the application.

Features in Various Plans

1. Following table lists the Features available in the Standard plans listed in AppExchange.
2. Since the app supported features are driven by Feature Parameters controlled by License Management app for each customer, features can be customized on per customer basis after a plan is purchased from app exchange at an additional cost.

Feature	Plan					
	starter	platform-standard	platform-enterprise	marketing-enterprise	datacloud-enterprise	unlimited
