

Automate your team's workflows across Salesforce & Google Drive

Increase productivity with a Google Drive file management system from an easy-to-use AppExchange app.

Streamline document management

You've invested in Salesforce and Google Drive to improve your team's productivity, but now their valuable time is spent navigating between the two systems. What if users could access Google Drive without leaving Salesforce? What if Google Drive folders were automatically created when Salesforce records were? What if you could eliminate the need for expensive Salesforce file storage by automatically uploading documents to Google Drive? It's all possible with Drive Connect.

Drive Connect's file and folder management capabilities bring a new level of productivity to your

Salesforce org. The Drive Links component can be easily added to any Salesforce record, improving your Google Drive document management. The Automate Drive Flow Action creates Google Drive folders with a consistent structure and automatically links them to Salesforce records, so your team can upload files directly to the correct folder from a Salesforce record.

Drive Connect is one of the easiest AppExchange apps to implement. Most customers are up and running in minutes. Sign up for our free 14-day trial at appiphony.com and start scaling your team today.

"Drive Connect makes connecting Google Drive and Salesforce easy!"
