

Transform Your Trials with Cloudbyz eTMF

Cloudbyz eTMF solution offers a cloud-based repository for all your clinical trial documents such as study protocols, informed consent forms, investigator brochures, monitoring reports, and others. Digitally store, manage, and share clinical trial documentation with a centralized overview.

Stay inspection ready, and provide real-time visibility of study documentation to CROs, sponsors, monitors, and other stakeholders in a clinical trial.

Product Features

 eTMF Export	 Automated & Configurable Metadata	 TMF Reference Models
 Archiving & Retention	 eTMF Locking	 Search & Retrieval
 eISF Connectivity	 Real-time Collaboration	 TMF Health Check
 Inspection Readiness	 Milestone Tracking	 Unified with CTMS, EDC, & Safety

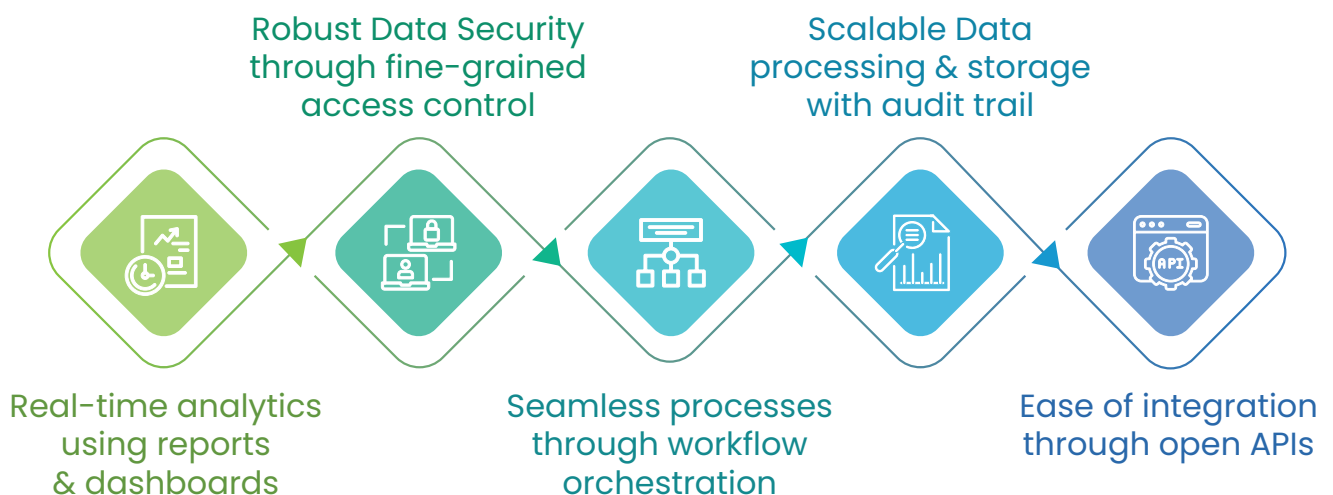

eTMF Benefits

Cloudbyz eTMF is built on the Cloud platform to enable Sponsors, CROs, and Sites to manage their trial documents with the highest levels of efficiency and integrity.

Platform Benefits

Cloudbyz eTMF makes the complex process of access, retention, and retrieval of clinical trial documents absolutely easy while meeting compliance requirements.
