

# Streamline the signing experience across DocuSign and Salesforce

Send documents, manage envelope statuses, and save signed contracts directly in Salesforce all with an easy-to-use AppExchange app.

## Signatures, simplified

You've invested in Salesforce and DocuSign to improve your signature collecting process, but now, your team's valuable time is spent navigating between the two systems. What if users could access DocuSign envelopes without leaving Salesforce? What if you could see the status of active envelopes directly in Salesforce records? What if you could choose where you want a contract saved even before it's signed? It's all possible now with eSign Connect.

eSign Connect is an affordable DocuSign and Salesforce solution designed to enhance your business operations and elevate customer experiences. With eSign Connect

you can effortlessly send documents and securely collect electronic signatures directly within Salesforce.

eSign Connect's DocuSign capabilities help expedite your organization's workflow so you can get important documents sent out for signature faster. Your team will be able to see where a client is at in the signing process directly from their Salesforce record, so you can effectively communicate with them and deliver a smooth customer experience.

eSign Connect is designed to work seamlessly with other Appiphony Apps, like Drive Connect. Together, these apps expedite your team's

workflow while minimizing errors across the documents and data in your Salesforce org.

The Appiphony Apps approach to product integration focuses on convenience, efficiency, and accessibility. Because of this, eSign Connect is one of the easiest AppExchange apps to implement. Most customers have it up and running in minutes. Sign up for a free 14-day trial on the AppExchange and start optimizing your signing process today.

## Features

### Core Functionality

Now you can manage DocuSign envelopes directly from Salesforce with these eSign Connect features:

- Create and send DocuSign Envelopes directly within Salesforce.
- Easily track and manage signature statuses with the Envelope Status Component.
- Automatically determine where completed files are saved, even before they're sent out for signature.
- Works with any existing DocuSign plan.

### Compatible with Drive Connect

eSign Connect and Drive Connect ensure a seamless workflow for a document's entire journey.

- Stay organized by automatically saving copies of signed documents to designated folders in Google Drive.
- Drive Connect's File Viewer allows you to edit Google Drive files without leaving Salesforce, so you can easily create and revise contracts before they're sent out.
- Use Drive Connect templates to automatically apply tags to DocuSign envelopes.
