

DS360io Release Notes - Summer 2025 (v3.17.0)

New Features and Improvements

Batch Processing Improvements

- **Large Dataset Error Handling**
 - Implemented sophisticated error bypass mechanisms for datasets exceeding 50,000 records for the Campaign batch process
 - Added automatic batch size optimization based on system resources
 - Introduced real-time progress indicators for batch operations
 - Note: Pages remain on the Visualforce framework (not converted to Lightning)

Technical Improvements

Security and Compliance Updates

- **Permission Set Refinements**
 - Updated permission sets following the principle of least privilege, ensuring core CRUD access to the DonorSearch object and fields
 - Implemented granular access controls based on Permission Set access for Lead, Contact, and Campaign actions - Retrieve, View, and Batch
