

Grow Your Revenue And Expand Your Company's Reach With E-commerce.

Provide a seamless experience for your customers to purchase activities, certifications, courses, and more without ever leaving the instance.

Admin Ease in the Platform, Power on the Backend

Our e-commerce engine is powered by industry leader Spree Commerce, providing a secure open source platform with all the bells and whistles needed for an enterprise-level e-commerce experience.

Spree Commerce is the engine behind many high-transaction online stores. Our partnership combines a best-in-class learning platform with a best-in-class online commerce provider, ensuring a seamless experience between the two.

Keep Your Customer's Data Secure with PCI and SCA Compliance

We won't sacrifice your customers' privacy by risking data leaks or not performing our due diligence with firewalls, encryptions, or out-of-date software. Intellum has met all I2 requirements to be in good standing with The Payment Card Industry Data Security Standard.

E-commerce is focused on supporting the needs of international organizations and is SCA Compliant (Strong Customer Authentication), adding an additional layer of security to reduce fraud on "customer-initiated" online transactions.

You can rest easy knowing that all of our features are secure, never compromising the sensitive data that your customers will be inputting to purchase your learning content. The Intellum Platform does not store any credit card numbers, mitigating vulnerability risk.

Sell Your Learning Content Your Way

From paths or single courses to full-blown certifications, there's no limit to what your organization can monetize. E-commerce is built for flexibility, and to support what aligns with your organization's financial goals

Track sales and transactions via reporting to understand what type of content is moving your revenue meter.

With Intellum E-commerce, You Can:

- ✔ Create discounts for redemption
- ✔ Payment wall for gated content that only unlocks after a successful transaction
- ✔ Set multiple currencies and prices for global organizations
- ✔ Segment discounts and sales by user groups
- ✔ Provide training credits (e.g. for bulk or team purchases) for use by one or multiple customers
- ✔ Manage tax calculations with Avalara Avatax or integrate with your custom solution
- ✔ Choose from over 50+ payment gateways
- ✔ Leverage Intellum's reporting capabilities for your finance team
 - View training credit balances by learner or group
 - View transactions by learner or group
