

3 Reasons for Finance

Debits and Credits

ShowCycle financials is a double entry system complete with Invoices, Payments, Credit Memos, a Transaction Journal, and Credit Card Processing just like any accounting system. The Transaction Journal can be exported into a CSV file ready for import into your general ledger. Or you could automate the export!

Reports and Dashboards

ShowCycle comes with several standard financial reports and dashboards. But it does not stop there. You can create an unlimited number of reports and dashboards and control who can view them.

Configure and Control

ShowCycle is completely configurable. You can easily add fields or change options of drop downs. You can configure price books, discounts, due dates, penalties, accounts, and credit card processing. Most importantly, you can easily implement financial controls the way you want them so that financial integrity is maintained.
