Implementation

Disruptive ERP vs Odoo vs Zoho One

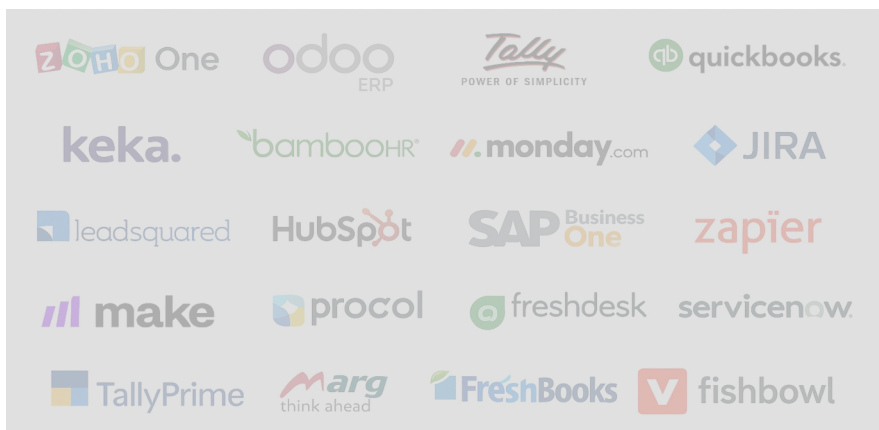

#	Feature/Category	Ranger Fusion	Odoo ERP	Zoho One
1	Customization & Flexibility	Highly customizable to specific business needs	Modular, but complex customization requiring developers	Limited customization outside pre-built apps
2	Implementation Time	2 to 4 weeks	Can be lengthy and require technical expertise	Moderate implementation time
3	User Interface & Experience	Modern, intuitive, and user-friendly	Can feel outdated or complex for some users	Varies across different apps within the suite
4	Scalability	Easily scalable as business grows	Scalable but can become costly with more modules	Scalable but may have limitations with certain integrations
5	Integration Capabilities	Seamless integrations with other business tools	Extensive app ecosystem but complex integration process	Wide range of apps but limited integration depth with non-Zoho tools
6	Support & Training	Dedicated support team and comprehensive training resources	Support varies, often relies on community forums or partners	Support is available but can be slow at times
7	License Cost (per user per month)	INR 1700	INR 1500	INR 2100
8	ROI (Return on Investment)	Faster ROI due to quicker implementation and adoption	ROI can be delayed due to complex customization	ROI depends on full suite utilization; may not be realized if not all apps are used
9	TCO (Total Cost of Ownership)	Lower TCO with usage-based pricing and minimal development needed	Higher TCO due to potential development costs and per-user fees	TCO is moderate if fully utilized; may be high if only a few apps are needed
10	Impact	Your business runs on secure and trusted Force.com Platform, Worlds #1 CRM.	General and Open Source System to run your business	Your Business need to follow what is built or existing already

Value Proposition

Ranger Fusion
