

Enable Circularity initiatives

Deploy Asset traceability directly inside Salesforce

Monitor Systems' whereabouts. Grow end-user visibility. Ensure **timely reverse logistics** of more products.

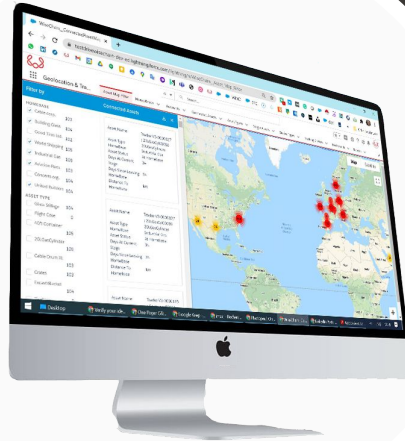

Designed for

salesforce

POWERFUL FEATURES

- Automatically **identifies** **end-user** locations
- **Uncovers** older and **unmonitored** systems
- Trigger **timely reverse logistic**

*"Circular Economy is among the most tangible decarbonization initiatives. Yet, its success rely on extensive knowledge of the **Installed Base**. Wisechain identifies >90% of end-user destinations to enable near-total re-collection of old assets. Cherry on the cake, it helps uncover unmonitored systems that generate immediate **service revenue**."*

Fabien Faure
Founder of WiseChain

GeoTracking in CRM tells you EXACTLY where your Systems end up

TAG high value systems

Any factory, any **high value** system

Assign systems to production sites

Monitor their **Journey** through the **Channels**

Automate Installed Base Visibility

Existing **Accounts** location matching

New end-user identification

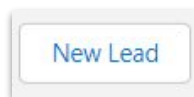

Channel partners' activity

Grow Service revenue

Reach out to existing or new **customers**

Discover previously **unmonitored** equipment

Offer more **services** and **parts**

Accelerate Circularity

Extend IB Automation to **more product lines**

Collect & re-Manufacture more products

Re-inject more products, **save more resources**
