## 1. End User View Updates

---

### 1.1 Enhanced Edit Functionality

- The security-hardened edit button now restricts visible fields strictly to those displayed in the current column view, reducing unintended data exposure.

### 1.2 Filtered Data Export

- Filtered data can now be exported directly — the export respects the active filter by default.
- An uncheck option is available to export the full dataset without clearing the current filtered view.

### 1.3 PDF Export Enhancements

- Column Selection — Export any five columns from the end user view to PDF with just a couple of clicks.
- Table Title Support — Exported PDFs now include the table title for consistent document uniformity.
- Data Borders — PDFs now render with table borders, improving data readability and visual presentation.

### 1.4 First Column Record Link

- The first column can now be configured as a direct record link, giving users one-click access to the full record detail view.
- If the field value is blank, a default [View Record] link name is provided automatically — no dead links.

Note: A one-field restriction applies — not all field types support the Record Link view.

## 2. Admin View Updates

---

### 2.1 DDT Help Center

- A dedicated Help Center is now available within the Admin view.
- Admins can reach the DDT team directly via email for support queries.
- Quick access to the official User Guide is available at any time from within the Help Center panel.

### 2.2 Admin List View — Follow Us for Upcoming Features

- Admins have the option now to follow DDT across various social media platforms directly from the list view to stay current with new releases and announcements.
- A link to the DDT website is embedded in the list view for quick access to the latest updates and news.

## 3. Technical Updates

---

### 3.1 Codebase & Stability

- General codebase enhancements implemented to improve application performance and maintainability.
- Several minor bugs are addressed in this release for a smoother end-to-end experience.

## Stay Connected with DDT

---

*Curious about what's coming next? We'd love to keep you in the loop.*

- Follow us on your preferred platforms to get the latest DDT release updates, tips, and announcements — links available directly in the Admin list view.
- Visit our website (linked in the Admin list view) for release highlights, documentation, and upcoming feature previews.

Have feature requests or ideas? Reach out via the Help Center — we're always listening
