

Install & User Guide

Red Restore gives Salesforce Admins the ability to find any Chatter group and restore it from its archived status by simply checking a box. And if you don't want to wait 90 days for your Chatter group to Auto-Archive, it's Red Restore to the rescue! By simply checking a box all Chatter Groups can be instantly archived.

It's just that simple.

No data lost in any Chatter group because Red Restore leverages the native feature of Archiving Chatter Groups but puts that power in YOUR hands!

Installation

From the AppExchange listing click the green “Get It Now” button.

The screenshot shows the AppExchange listing for 'Red Restore for Chatter' by Red Argyle. The header features the app's logo and a red banner with the text 'VIEW & RESTORE ALL ARCHIVED CHATTER GROUPS'. Below the banner, the app's name and description are displayed, along with a 'Get It Now' button. A preview of the app's interface is shown on the right, displaying a table of archived chatter groups.

VIEW & RESTORE ALL ARCHIVED CHATTER GROUPS

- See all Archived Chatter Groups from a single tab
- Mass Restore Archived Chatter Groups
- Mass Archive Chatter Groups
- 100% native on the Salesforce Platform

Then choose if you want to install into production or a Sandbox. As a best practice a Sandbox is best for trying out new apps before pushing them to production.

The screenshot shows a dialog box titled 'How would you like to continue?'. It contains two buttons: 'Install in production' and 'Install in sandbox'. The 'Install in production' button includes the text 'Includes active, trial or developer orgs'. The 'Install in sandbox' button includes the text 'Test in a copy of your production org'.

How would you like to continue?

Install in production
Includes active, trial or developer orgs

Install in sandbox
Test in a copy of your production org

After signing in you will see this screen that presents your package details. Click the orange “Continue” button.

The screenshot shows the Salesforce Package Installation Details page for a package named 'Red Restore'. The page includes a sidebar with navigation options like 'Administer', 'Build', and 'Monitor'. The main content area displays package details and a list of components categorized by type (Tabs, Resources, Pages, Apps, Code). Each component has a table with columns for Action, Component Name, Parent Object, Component Type, and Installation Notes. An orange 'Continue' button is visible next to the package details.

Package Name	Red Restore
Version Name	1.0
Version Number	1.0
Publisher	Red Argyle

Package Components

▼ Tabs (1)

Action	Component Name	Parent Object	Component Type	Installation Notes
Create	Red Restore		Document Folder	This is a brand new component.

▼ Resources (2)

Action	Component Name	Parent Object	Component Type	Installation Notes
Create	Red Restore Icon		Document	This is a brand new component.
Create	Red Restore		Document Folder	This is a brand new component.

▼ Pages (1)

Action	Component Name	Parent Object	Component Type	Installation Notes
Create	Groups		Visualforce Page	This is a brand new component.

▼ Apps (1)

Action	Component Name	Parent Object	Component Type	Installation Notes
Create	Red Restore		Document Folder	This is a brand new component.

▼ Code (4)

Action	Component Name	Parent Object	Component Type	Installation Notes
Create	OpenTests		Apex Class	This is a brand new component.

On Step 2 of 3 during the Package installation we recommend choosing “Grant Access to Admins Only” for the Security Level.

The screenshot shows the 'Package Installer' for 'Red Restore' at Step 2: Choose security level. It prompts the user to select security settings from three options: 'Grant access to admins only', 'Grant access to all users', and 'Select security settings'. The first option is selected by default.

Package Installer
Red Restore

Step 2. Choose security level

Select security settings:

- ☒ Grant access to admins only Users with your profile get full access (best for limited deployments)
- ☐ Grant access to all users All internal custom profiles get full access
- ☐ Select security settings User access set by profile (recommended for most packages)

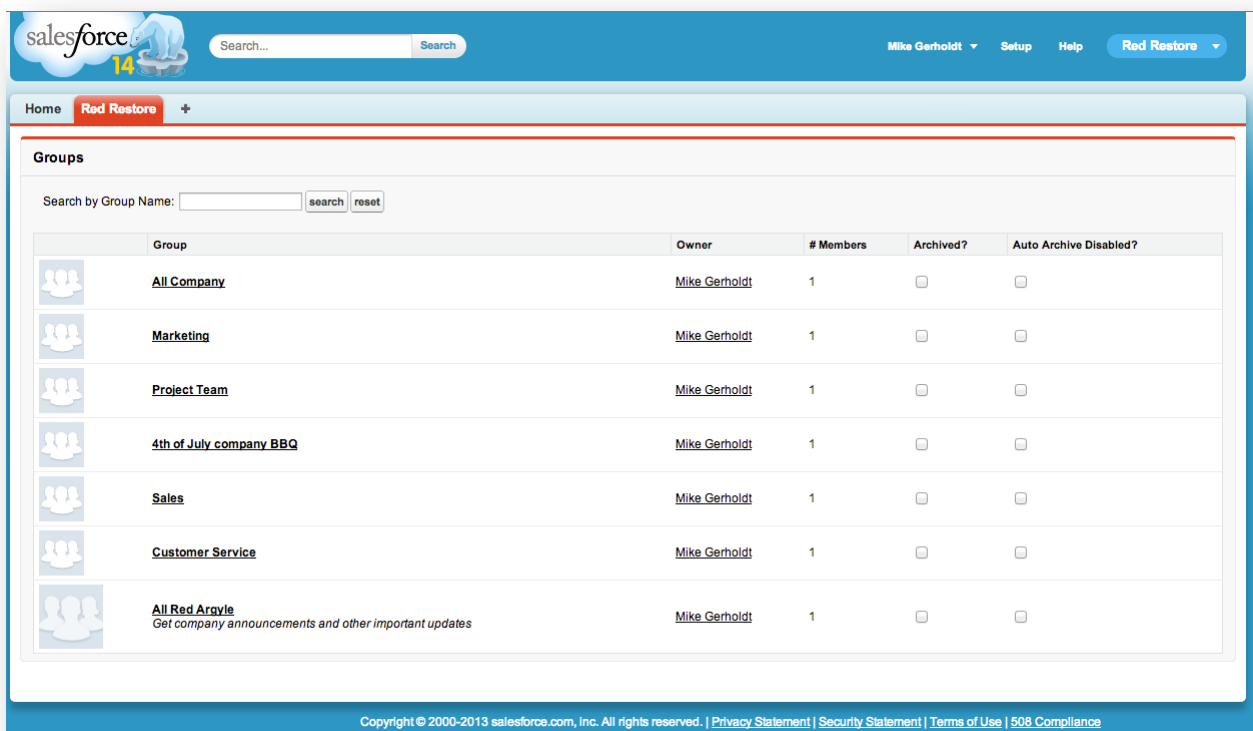

Using Red Restore

Red Restore gives you the ability to view all of the Chatter Groups in your Salesforce org from a single tab and with just a click of the checkbox instantly Archive or Restore any Chatter Group! In addition you can change the “Auto Archive” option for all chatter groups.

Red Restore leverages the native Archiving function of Chatter Groups and lets you quickly clean up the Chatter Group listing by instantly archiving any Chatter Group. By leveraging the native functionality of Chatter Group Archiving all of the posts are not lost when the group is archived. If you need to restore the group at a later date all you have to do is uncheck the “Archived?” box.

Red Restore tab

This is your “home base” to view all of the Chatter groups in your org. In the example below we can see that all the Chatter Groups are active because the “Archived?” Checkbox isn’t checked.

The screenshot shows the Salesforce Red Restore interface. At the top, there's a blue header with the Salesforce logo, a search bar, and user information (Mike Gerholdt). Below the header, there's a navigation bar with tabs for Home and Red Restore. The Red Restore tab is active, showing a list of Chatter Groups. The list has columns for Group, Owner, # Members, Archived?, and Auto Archive Disabled?. All groups are currently active (Archived? checkbox is unchecked).

Group	Owner	# Members	Archived?	Auto Archive Disabled?
 All Company	Mike Gerholdt	1	☐	☐
 Marketing	Mike Gerholdt	1	☐	☐
 Project Team	Mike Gerholdt	1	☐	☐
 4th of July company BBQ	Mike Gerholdt	1	☐	☐
 Sales	Mike Gerholdt	1	☐	☐
 Customer Service	Mike Gerholdt	1	☐	☐
 All Red Argyle <i>Get company announcements and other important updates</i>	Mike Gerholdt	1	☐	☐

Archiving Chatter Groups

To instantly Archive any Chatter Group from the Red Restore tab simply check the “Archived?” box.

Example: If we wanted to Archive the “4th of July company BBQ” and “Project” Group we can just check the box on the Red Restore Tab and the group is instantly archived! To restore the group, simply uncheck the box.

Checking the My Archived Groups we can see that the groups are archived.
