

Post Install Configuration

Getting started is easy. All you have to do is to add the « Mass reassign opportunities » tab to the application of your choice, so the feature is easily accessible for your users.

To do so, navigate to Setup > Create > Apps. Click the « Edit » button next to the app you want to add the new tab to.

[Help for this Page](#)

An "app" is a group of tabs that works as a unit to provide application functionality. You can customize the standard apps provided by salesforce.com to match the way you work, or you can build your own on-demand apps by grouping standard and custom tabs into new custom apps. With custom apps, you can extend the kinds of information that you manage and share online beyond CRM.

The Force.com platform is the on-demand multitasking environment offered by salesforce.com. It enables users to switch between apps with a single click, through the Force.com AppExchange menu which displays at the top of every page.

Custom apps work in conjunction with User Profile Tab Visibility settings. [View User Profiles now.](#)
