

Model Automation for Projects with Process and Products

M@PPP

Your IT practices
has never been
so easy

This App is a project management and process improvement, based on services, support processes, engineering processes, time and expense tracking, using the international best practices like CMMI®, PMBOK®, PRINCE2®, ITIL® also included local methodologies like MAAGTIC-SI and MoproSoft used by Government and IT Companies in Mexico.

This ECM Solutions APP will help you to:

- ➊ Increase revenue by improving project performance and increasing the probability of capturing repeat/new business.
- ➋ Monitor overall Enterprise project portfolios,
- ➌ With process tailoring you can create your own framework to hands on a Project.
- ➍ Manage deliverables with automated creation templates (Products).
- ➎ Connect related requirements, use cases, test cases and tasks for easy traceability.
- ➏ Determine whether you are on, ahead of or behind planning,
- ➐ Create and maintain team members history, information, availability and training.
- ➑ Manage Risks, Issues, Non-Compliances, using workflows.
- ➒ Monitor the time incurred and planned in each stage, process and project by your team members.

M@PPP - Model Automation for Projects with Process and Products Accelerate time to market by enabling collaboration and Enterprise social network between developers, product managers, sponsors and CEO's. Deliver to you a flexible, and secure on demand solution.

Leverage customizable workflows to collaborate with your team members, partners and customers.

Fine access privileges for each Project for secure collaboration also Show project status to your customers online or mobile.

Get real time collaboration, alerts and dashboards.

We have two editions to make easier manage your projects, less formal and formal methodologies. Select the best fit to your needs. **M@PPP uc** (un certified) for small business and **M@PPP tbc** (to be certified) for IT companies with formal methodology.
