

# PROJECT GOVERNANCE – A SINGLE SOURCE OF TRUTH

**F** Fusion  
experience

Manage risk and compliance with a  
consistent governance framework

# EVM for Project Governance

A real-time solution to empower executives to get to grips with **Risk and Compliance** across ALL their enterprise projects. Providing a single source of truth and governance framework across projects - from IT to M&A to marketing - by increasing the transparency in reporting across projects, reducing project risk by removing bias and out of date and inconsistently reported data.

**Moving beyond silos and creating power at the centre...**

**EVM for Project Governance helps Senior Executives to increase the transparency of project risk...** by asking the hard questions at each stage to determine the risk rating for each project. Executive dashboards allow senior management team to instantly see and respond to risk data as it is entered by the Project Manager/Director.

EVM for Project Governance not only helps you to run one project at a time but also direct and manage the tens of hundreds of projects in your business through effectively applied best practice and a vehicle to help you manage project risk and governance consistently from inception to close.

## Typical Outcomes

- Proactively make decisions by sensing early and responding quickly to issues
- Reduce risk across all projects
- Ensure all projects are governed and reported on consistently
- Quickly identify best practice
- Framework for adapting behaviours to mitigate against future project risks.

## Solution Summary

- Standard Project Objects
- Customisable templates
- 7 categories of risk as standard
- Industry leading methodology to apply across your organisation<sup>1</sup>
- Real-time visualisation and measurements across multiple risk data points per project
- Interactive guide to methods, accelerates on boarding and consistency
- App using Salesforce's platform (can be added to your existing Salesforce environment).
