

DocAve for Salesforce

Protect with confidence
Restore with speed
Integrate with precision

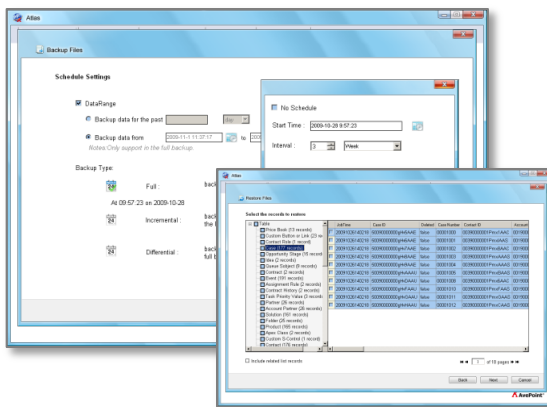

Data Protection

Data Replication

Content Integration

DocAve for Salesforce is the industry's most powerful solution for protecting, managing, and integrating Salesforce CRM data with Microsoft SharePoint Products and Technologies. With a unified platform and three independently deployable modules, DocAve for Salesforce was developed in response to the growing demand for a comprehensive backup and recovery solution for Salesforce CRM data, as well as a solution for the seamless, real-time integration of Salesforce CRM content into the Microsoft SharePoint platform.

AvePoint.com/download

Business Advantages

- Ensure minimal productivity loss following accidental deletion of Salesforce CRM content. On-premise backups allow for swift, item-level, and full-fidelity content restorations straight back to your Salesforce CRM environment
- Incorporate Salesforce CRM data into the business processes and reporting functionality already managed via SharePoint, unifying sales and enterprise data analyses and collaboration
- Streamline delivery of content authored in SharePoint out to teams via Salesforce, ensuring efficient access to the very latest organizational information
- Leverage existing permissions and metadata schemas within Salesforce CRM, ensuring synchronization of securities across platforms

DocAve Backup and Restore for Salesforce

Powerful and nimble terrestrial backup & item-level recovery for Salesforce CRM data

DocAve Data Replicator for Salesforce

Seamless, real-time transfer of Salesforce CRM data to Microsoft SharePoint

DocAve Content Replicator for Salesforce

Automated integration of Salesforce Content Libraries with Microsoft SharePoint

DocAve Backup and Restore

Full-fidelity terrestrial backup & item-level recovery for Salesforce CRM data

- Backup Salesforce CRM data to your on-premises terrestrial file stores for swift, lossless recovery following accidental deletion
- Granularly restore data back to the Salesforce CRM cloud, or to any network-addressable or cloud location, ensuring zero data and productivity loss
- Flexible – full and incremental – backup scheduling enables the protection of Salesforce CRM data as business demands, without overburdening storage resources
- Enterprise-strength encryption & compression ensure comprehensive “on-premise” protection of Salesforce data

DocAve Data Replicator

Seamless, real-time transfer of Salesforce CRM data to Microsoft SharePoint

- Real-time replication of Salesforce CRM data to SharePoint lists
- Comprehensive metadata and user mapping ensures full-fidelity replication of data between platforms
- Enables organizations to leverage SharePoint’s powerful Business Intelligence and enterprise analytics tools on business-critical Salesforce CRM data

DocAve Content Replicator

Automated integration of Salesforce Content Libraries with SharePoint Document Libraries

- Real-time synchronization of SharePoint with Salesforce Content Libraries
- Empowers organizations to publish Salesforce-stored documents via SharePoint for fully integrated, enterprise-wide information management
- Flexible version and metadata filters enable seamless assimilation of Salesforce CRM content into SharePoint workflows
- Full metadata and securities mapping enables full integration with Microsoft Active Directory (AD) and delivery of all AD permissions to Salesforce (as discrete metadata)
