2GO Suite of iPad Applications

Model Metrics 2GO Customizable Apps enable business users to take critical business functionality with them, wherever they go.

The 2GO Apps include use cases for executive dashboards, field sales reps, field service, consumer packaged goods and retail execution. The only limit is our imagination.

Modular Architecture

2GO enables organizations to pick and choose functionality from a series of pre-built, mobile-enabled UI components to rapidly build and deploy custom mobile apps. This platform based approach enables

Metadata Aware

2GO is metadata aware, allowing clients and administrators to customize the layout on the mobile device with clicks not code.

Dynamic Custom User Interfaces

2GO helps field workers simplify everyday tasks, enable productivity with streamlined clickstreams and usability, and seamless performance on or offline.

Adding Critical Mobile Functionality to Enterprise Apps

An elegant interface simplifies customer profiling, signature capture, bar-code scanning, sample and inventory management and call reporting.

Our Mobile Clients Include
