At Model Metrics we are proud of our status as a Premier Consulting Partner to salesforce.com. With more than 1,500 successful implementations under our belts, we are one of salesforce.com's most successful and innovative partners.

Model Metrics has completed global rollouts in multiple languages for some of the largest companies and successfully developed the most innovative applications on the Force.com platform.

Always embracing the latest technologies, Model Metrics has significant experience customizing and deploying Force.com Sites, Portals, and Salesforce Ideas. The solutions integrate with your existing website and optimize communication with your customers and partners:

- ✓ Partner Portal for salesforce.com enabling world-class communication with their partners and driving unprecedented organizational efficiency
- ✓ Unparalleled eCommerce website with astonishing graphics all built on Force.com Sites

Model Metrics has led the way in the development of custom applications utilizing Adobe Flex & AIR, winning the prestigious Appy Award. With salesforce.com's new Adobe Flash Builder for Force.com, your possibilities are endless. Here's what some customers are doing:

- ✓ Custom offline applications for Field Sales and Field Service Management
- ✓ Custom offline solution for Reimbursement Management
- ✓ Real time, in-line analytics in Salesforce CRM

Model Metrics offers a full range of development services on the Force.com platform. We leverage our Salesforce knowledge and expertise along with other complementary technologies such as Amazon Web Services, Google and Adobe Flex and AIR to create innovative, high value solutions for our customers. If you can dream it, we can build it.

- ✓ Custom application enabling media planning with roll-up financial metrics
- ✓ Custom application integrating multiple analytics applications and establishing a broker scorecard
